Rethinking Thinking Martin Cohen 2022-04-04 How do generals - and business strategists - outwit their opponents? Where do designers and artists get their inspiration from? How can all of us 'pump up the originality' and steer our thinking off the standard, well-worn tracks? Everyone, as the French philosopher René Descartes pointed out long ago, thinks. That's the easy bit. The harder part, and what this book is really about, is how to make your thinking original and effective. And here the problem is that too often we don't really engage the gears of our brain, don't really look at issues in an original or active way, we just respond. Like computers, inputs are processed according to established rules and outputs are thus largely predetermined. Yet that's not what makes us human and that's not where the big prizes in life are to be found. In the third millennium, we need to think a bit more - not less! And so the focus in this book is on practical suggestions about ways to think better... on thinking strategies that each have their own style, applications and benefits.

The Leader's Bookshelf Martin Cohen 2020-10-09 Which books inspired some of the world's most successful people – and why? Come on a journey of literary exploration and find out how books can impact your life. It turns out that the life stories of many famous people start out with a particular book that inspired them when young. Here, Martin Cohen explores the lives of some remarkable people – inventors, scientists, business gurus and political leaders – and the books that have challenged, inspired, and influenced them. And so exploring the ideas, dreams and inspirations that this diverse group shared is at the heart of this book too. Inspiration, in particular, is the thread that ties together individuals with characters and backgrounds as diverse as Jane Goodall and Barack Obama, Malcolm X and Judge Clarence Thomas, Oprah Winfrey and Malala Yousafzai, Rachel Carson and Frans Lanting. Often, behind many tales of achievement lies much more than a collection of smart tactics. There are beliefs and values that guide many a grand strategy, too. And the strategies are often very different, which if you think about it, shouldn't come as a surprise. If there really were just one recipe for success, well, everyone would be using it already. No, the thing that unifies these disparate approaches is that they all provided for their owners a kind of conceptual grid onto which a wide range of day-to-day creative, scientific, or

business practices are able to develop and grow. For Sergey Brin and Larry Page, the founders of Google, for example, the grid was Charles Darwin's notions of natural mutation and iteration. With Henry Ford, the man who pioneered the method of the assembly line, the grid was an obscure, ethereal theory of life as a sequence of reincarnations. And for both Oprah Winfrey and Steve Jobs, the grid was existentialist ideas about the pursuit of authenticity. In all these cases, a grand, indeed often philosophical, theory meshed perfectly with a practical business strategy. All of these remarkable people, and the books that most inspired them, are explored in this book.

The Little Book of Thunks Ian Gilbert 2007-03-15 A Thunk is a beguiling question about everyday things that stops you in your tracks and helps you start to look at the world in a whole new light. The author guides you through the origins and uses of Thunks and demonstrates how this powerful little book can develop philosophical thinking for all ages ... remember there are no right or wrong answers to these questions. How liberating is that ...? Winner of The Author's Licensing and Collecting Society Award for Educational Writing by the Society of Authors.

Wittgenstein's Beetle and Other Classic Thought Experiments Martin Cohen 2008-04-15 Wittgenstein's Beetle and Other Classic Thought Experiments invites readers to participate actively in discovering the surprisingly powerful and fruitful tradition of "thought experiments." Gives a lively presentation of an "A to Z" of 26 fascinating and influential thought experiments from philosophy and science Presents vivid and often humorous discussion of the experiments, including strengths and weaknesses, historical context, and contemporary uses Provides a "how to" section for engaging in thought experiments Includes illustrations, mini-biographies, and suggestions for further reading.

101 problemas de filosofía Martin Cohen 2008-09-29 Escrito y concebido en un tono desenfadado, 101 PROBLEMAS DE FILOSOFÍA es una original introducción a este dominio del pensamiento. Destinado tanto al aficionado a la filosofía como a aquellos que no tienen conocimiento previo de ella, la primera parte del libro presenta los problemas filosóficos en forma de «ficciones narrativas» que animan a pensar y debatir, mientras que la segunda contiene comentarios a los mismos y un glosario que amplía la información sobre los conceptos y pensadores más importantes. MARTIN COHEN retoma la aspiración original de la filosofía como actividad, como capacidad que hay que desarrollar, ya que, como apuntara en su día Bertrand Russell, son los interrogantes que plantea la filosofía los que amplían nuestra concepción de lo posible y enriquecen nuestra imaginación intelectual. Esta NUEVA EDICIÓN revisada por el autor incorpora problemas que inciden en nuevos campos y actualiza, consecuentemente, los comentarios y el glosario que ayudan a afrontar sus posibles soluciones.

Philosophical Tales Martin Cohen 2009-01-21 Enlightening and entertaining, Philosophical Tales examines a few of the fascinating biographical details of history's greatest philosophers (alas, mostly men) and highlights their contributions to the field. By applying the true philosophical approach to philosophy itself, the text provides us with a refreshing 'alternative history' of philosophy. Opens up new

philosophical debate by applying the true philosophical approach to philosophy itself Provides summaries of the most celebrated and philosophically interesting tales, their backgrounds, and assessments of the leading players Explores philosophers and schools of thought in one key philosophical text to supply a solid grounding in philosophical ideas and individuals Shakes some of the foundations of philosophy with the aim of encouraging the reinvigoration of philosophy itself

40 lessons to get children thinking: Philosophical thought adventures across the curriculum Peter Worley 2015-10-31 This is the type of book many teachers will keep on their desk and use the exercises very regularly; for me it is up there with Geoff Petty's 'Evidence-Based Teaching' and Paul Ginn's 'The Teacher's Toolkit' as an essential resource. Worley is an excellent clear writer, who communicates very complex ideas very well." Francis Gilbert [<http://www.francisgilbert.co.uk/>], teacher, teacher trainer and author of 'I'm a Teacher, Get Me Out of Here' Inspire your class to think more deeply about curriculum subjects and get them actively taking part in exciting philosophy experiments today! This new book by bestselling author and founder of The Philosophy Foundation Peter Worley is a collection of practical lesson and activity plans to use in the primary classroom to get children thinking philosophically and creatively around different curriculum areas. The sessions - called thought adventures - use thought experiments, stories and poems to get children discussing and understanding topics more deeply. Each session is explained step-by-step, with everything you need to 'do' and 'say' spelled out, and all the equipment you need listed with instructions on how to set up each session. You can implement the sessions in the classroom either as a complete lesson or as an activity within another lesson. All the sessions are tried and tested by Peter and his colleagues at The Philosophy Foundation who work with primary schools on a regular basis.

The Philosophy Shop Peter Worley 2012-09-27 Imagine a one-stop shop stacked to the rafters with everything you could ever want to tap into young people's natural curiosity and get them thinking deeply. Well, this is it! Edited by professional philosopher Peter Worley from The Philosophy Shop and with a foreword by Ian Gilbert, this book is jam-packed with ideas, stimuli, thought experiments, activities, short stories, pictures and questions to get young people thinking philosophically. Primarily aimed at teachers to use as a stimuli for philosophical enquiries in the classroom or even as starter activities to get them thinking from the off, it can also be used by parents for some great family thinking or indeed anyone fed up of being told what to think (or urged not to think) and who wants a real neurological workout. The proceeds of the book are going towards The Philosophy Foundation charity.

**Political Philosophy** Martin Cohen 2008-09-20 Guiding the reader through the key arguments of the classic figures of Western political philosophy, from Plato through to the modern era, this revised edition includes new essays on Aristotle's "Politics", Confucianism, Islamic social philosophy, and Nazism as well as additional material on "Roman Law", Anarchism and "anti-capitalism". Cohen moves chronologically through the development of political philosophy presenting it as a series of "key texts", which (after setting in context) he allows to speak in their own terms before offering short, precise analyses of their strengths, weaknesses and influence. The book finishes with a discussion of modern liberalism and conservatism. Providing both a broad overview and precise summaries of key ideas, this guide will be invaluable for all students of political thought.

**How to Love** Martin Cohen 2014-03 **MAKE LOVE LIKE A PHILOSOPHER** "Family Values, Sex and a little bit of Philosophy" If anyone can teach us about love, it really ought to be the great philosophers. But of course, being a lover of wisdom and a wise lover are two very different things. Just consider these famous philosophical chat-up-lines: " \* Are you interested in immortality?" Diotima, a lady who, according to Plato, greatly impressed Socrates " Do you have your sexual appetites under control? I do." Kant, his advice to young people generally. And: " Would you like to share my grapes?" Schopenhauer, who actually used this line (unsuccessfully) to chat up a young lady. For better or (more likely) for worse, here are some of philosophy's most celebrated ideas and arguments on love and relationships.

**God Is Ethics** Mitchell Frangadakis 2008-01 **GOD IS ETHICS** is an invitation to explore the perennial questions of philosophy, including the Socratic triad of: 1) What is knowledge? 2) How should I conduct myself? and 3) What is the best form of governance? Drawing from the philosophical traditions of both East and West, the reader is offered a variety of responses to these and other questions, and is ultimately invited to draw his or her own conclusions regarding the nature of truth and reality.

De geschiedenis van de filosofie A.C. Grayling 2019-08-22 De eerste volledige geschiedenis van zowel de westerse als oosterse filosofie De geschiedenis van de filosofie is een waar epos: de ontdekking van de ideeën, inzichten en leringen van de meest creatieve denkers in de geschiedenis. Maar sinds de publicatie van Bertrand Russell's standaardwerk Geschiedenis van de westerse filosofie in 1945 is er niet meer zo'n allesomvattend werk meer verschenen over de geschiedenis van deze intellectuele reis. Met De geschiedenis van de filosofie brengt filosoof en hoogleraar A.C. Grayling daar verandering in. Met zijn kenmerkende helderheid en finesse neemt

hij de lezer mee van de wereldbeschouwingen en moralen van voor Boeddha, Confucius en Socrates, langs de christelijke overheersing van het Europese gedachtegoed, naar de renaissance en de verlichting, tot aan Nietzsche, Sartre en de filosofie van vandaag de dag. En aangezien de geschiedenis van de filosofie niet compleet is zonder de grote filosofische stromingen uit India, China en de Perzisch-Arabische wereld geeft hij ook hiervan een gedetailleerd overzicht. Grayling behandelt een breed scala aan onderwerpen, waaronder de metafysica, ethiek, esthetiek en logica. Dit doet hij aan de hand van het gedachtegoed van een groot aantal befaamde filosofen evenals minder bekende maar zeer invloedrijke denkers. Tevens gaat hij dieper in op de vraag wat we van dit geheel aan stromingen hebben geleerd, én op welke vlakken we nog vooruitgang kunnen boeken. Het resulteert in een toegankelijke maar complete geschiedenis die de ogen doet openen. 'Als er iets bestaat als de Briste variant van "De denker", dan is dat zonder twijfel A.C. Grayling.' The Times 'Vijf minuten hierin lezen leidt de hele dag tot interessante overpeinzingen.' Independent Professor A.C. Grayling is het hoofd van het New College of the Humanities in Londen en fellow van St Anne's College, Oxford. Hij schreef en redigeerde meer dan dertig boeken over filosofie en andere onderwerpen en heeft zich tevens gespecialiseerd in niet-westerse filosofie. Daarnaast schreef hij jarenlang columns voor The Guardian en The Times en was hij voorzitter van de Man Booker Prize van 2014.

You Kant Make it Up! Gary Hayden 2011-09-01 Drawing on the writings of the great philosophers, You Kant Make it Up sends the reader on thrilling, non-stop tour of their most outrageous and counter-intuitive conclusions. Harry Potter is real. Matter doesn't exist. Dan Brown is better than Shakespeare. All these statements stem from philosophy's greatest minds, from Plato to Nietzsche. What were they thinking? Overflowing with compelling arguments for the downright strange - many of which are hugely influential today - popular philosopher Gary Hayden shows that just because something is odd, doesn't mean that someone hasn't argued for it. Spanning ethics, logic, politics, sex and religion, this unconventional introduction to philosophy will challenge your assumptions, expand your horizons, infuriate, entertain and amuse you. How to Eat Martin Cohen 2014-03 EAT LIKE A PHILOSOPHER "Ancient health tips, cheese, and a dash of philosophy" What would the great French 'Romantic' philosopher, Jean-Jacques Rousseau, have made as a tasty entree for nights of passion? Why, cold strawberry soup of course. Could supping regularly on that Scottish speciality, Sheep's Head broth, have given David Hume, his unique insights into science and philosophy? And what's the ethical alternative to a barbecue featuring dog burgers and fried grasshoppers? For better or (more likely) for worse, here are some of philosophy's best recipes and worst arguments about food and what to eat.

Philosophy for AS and A2 Elizabeth Burns 2004 Philosophy for AS and A2 is the definitive textbook for students of Advanced Subsidiary or Advanced Level courses. The book is structured directly around the AQA specification, devoting a chapter each to the six themes covered by the syllabus.

101 Philosophy Problems Martin Cohen 2013 Does Farmer Field really know his prize cow, Daisy, is in the field? When is an unexpected exam not wholly unexpected? Are all bachelors (really) unmarried? Martin Cohen's 101 Philosophy Problems, Fourth

Edition introduces philosophy in an entertaining but informative and stimulating way. Using philosophical puzzles, conundrums and paradoxes he skilfully unwraps some of the mysteries of the subject, from what we know - or think we know - to brainteasing thought experiments about ethics, science and the nature of the mind. For the Fourth Edition there are many new problems, including Maxwell's Moving Magnets, Einstein Changes Train Times, and Zeno's Paradox of Place; as well as two brand new sections including puzzles such as Lorenz's Waterywheel, and the Battle for Fractal Farm, and perplexing ethical dilemmas. The book has been extensively revised to bring it up to date with new developments in philosophy and society. With an updated glossary of helpful terms and possible solutions to the problems at the end of the book, 101 Philosophy Problems is essential reading for anyone coming to philosophy for the first time.

Habilidades de Pensamento Crítico Para Leigos Martin Cohen 2017-10-30 Neste livro você encontrará muito mais que somente o material convencional sobre as Habilidades do Pensamento Crítico, o qual trata amplamente de como evitar falácias lógicas e seguir as regras de estruturação de um ensaio. A maioria dos outros livros centra-se nesses aspectos do Pensamento Crítico porque é simples falar sobre eles, mas difícil fazer com que alguém os pratique. De fato, assim como a filosofia em si mesma (e o Pensamento Crítico é, tradicionalmente, um ramo da filosofia), a única maneira, devidamente compreendida, de aprender o método consiste em colocar as habilidades em uso. Assim, o que tento oferecer aqui é uma espécie de mapa ou guia de viagem para ter em mãos quando você começar a aplicar ativamente o Pensamento Crítico em quaisquer áreas que desejar. Incluo no livro considerável background oriundo de debates acadêmicos para você compreender o “porquê” além do “o que” e diversas dicas e conselhos para o “como”, e, ainda, complemento com algumas oportunidades para experimentar-se em exercícios práticos. Habilidades de Pensamento Crítico Para Leigos oferece uma introdução simples a temas que poderiam ser bem complexos, se apresentados de outra forma. Você aprenderá ainda dicas sobre como ler nas entrelinhas, checar o embasamento, e até mesmo sobre quando não levar a lógica tão a sério.

No Holiday Martin Cohen 2006-06-01 In this first Disinformation Travel Guide, Martin Cohen visits exotic locations (80 of them!) but with a different aim than the usual travel book: to seek out the suffering and injustices, not to skirt them. We will see the dark red waters of “Murdering Creek” in Australia, silent testament to the ongoing genocide of the world's oldest people... we will visit the olive groves of Palestine where the helicopter gunships of the Israeli Army patter by like so many gigantic marauding insects, and we will queue up to see not museums and art galleries, but the more sinister monuments of politics, like the academy of terror funded by the CIA at Fort Benning in Georgia, or the poisoned shores of the Aral Sea revealing an abandoned biological warfare center... We will visit not the great “sights” but the great “sores,” the forever cursed cities of Hiroshima and Nagasaki, where so many died, as Churchill might have said, for so little. We'll enter the no-man's lands of the demilitarized zones of past conflicts—between North and South Korea, between Syria and Israel, even between Catholic and Protestants in Northern Ireland.

Filosofie voor beginners Donald Palmer 2013-04-04 Filosofie voor beginners maakt op

een uitermate originele wijze de leek wegwijs in de filosofie, een terrein dat veel mensen direct geneigd zijn als 'moeilijk' te bestempelen. Filosofie voor beginners verklaart en illustreert - het boek bevat zo'n driehonderd originele tekeningen van de auteur - moeilijke filosofische begrippen op een manier die ze toegankelijk maakt voor degene die weinig of niets van filosofie afweet. De tekeningen hebben een cartoonachtig karakter en zijn juist daardoor een goede hulp bij het verhelderen van complexe filosofische begrippen en theorieën. Filosofie voor beginners geeft een beknopte inleiding in de filosofie. Het begint bij de oude Grieken en schetst de verdere geschiedenis van de filosofie tot en met de behandeling van eigentijdse filosofen. Een docent filosofie over dit boek: 'Zo kan dit boek de leemten vullen in de bibliotheken van het voortgezet onderwijs, maar ook in de boekenkasten van tieners en volwassenen.'

Smith's Wealth of Nations Martin Cohen 2001 This lively account explores the structures and main themes of Adam Smith's celebrated work, and locates it in its historical and social context. In addition, the author summarizes key ideas and concepts, and fairly assesses Smith's recommendations for political and economic policy.

101 Philosophy Problems Martin Cohen 2002 A fresh and original introduction to philosophy, written in a clear and entertaining style. The first part of the book presents philosophical problems, the second part contains solutions and further discussions.

Paradigm Shift Martin Cohen 2015-09-09 Why do giraffes have long necks? It can't really be for reaching tasty leaves since their main food is ground level bushes, tidy though that explanation would be. And how does relativity theory cope with the fact that the observable universe defies prediction by being far too small and anything but homogeneous? By inventing a vastly larger, but invisible, universe. And what exactly should we make of the scientists who claim to be witnessing thought itself, when the changes of blood flow in the brain that they observe are a thousand times slower than the neuronal activity it is supposed to reveal? A little scepticism is in order. Yet if philosophers of science, from Thomas Kuhn to Paul Feyerabend, have argued that science is a more haphazard process, driven by political fashion and short-term economic self-interest, today almost everyone seems to assume it is a vast jigsaw of interlocking facts pieced slowly but steadily together by expert practitioners. In this witty but profound 21st-century update on the issues, Martin Cohen offers vital clues for understanding not only the way knowledge develops, but also into the dangers of accepting too readily or too uncritically the claims of experts of all kinds - even philosophical ones! The claims are invariably presented as objective fact, yet are rooted in human subjectivity.
