Everyday Lifestyles and Sustainability Fabricio Chicca 2018-04-09 The impact of humanity on the earth overshoots the earth's bio-capacity to supply humanity's needs, meaning that people are living off earth's capital rather than its income. However, not all countries are equal and this book explores why apparently similar patterns of daily living can lead to larger and smaller environmental impacts. The contributors describe daily life in many different places in the world and then calculate the environmental impact of these ways of living from the perspective of ecological and carbon footprints. This leads to comparison and discussion of what living within the limits of the planet might mean. Current footprints for countries are derived from national statistics and these hide the variety of impacts made by individual people and the choices they make in their daily lives. This book takes a 'bottom-up' approach by calculating the footprints of daily living.

The purpose is to show that small changes in behaviour now could avoid some very challenging problems in the future. Offering a global perspective on the question of sustainable living, this book will be of great interest to anyone with a concern for the future, as well as students and researchers in environmental studies, human geography and development studies.

Driving from Japan Wanda James 2005-01-03 This study chronicles the success of the Japanese car in America. Starting with Japan's first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle.

Het innovatiedilemma Clayton M. Christensen 2015-03-27 Geroemd door iedereen van Steve Jobs en Jeff Bezos tot Malcolm Gladwell, is dit boek een bijbel voor iedereen die begrijpt dat je ontwrichtende veranderingen een stap voor moet zijn. Deze bestseller presenteerde als eerste de baanbrekende gedachte dat fantastische bedrijven ten onder kunnen gaan, juist omdat ze alles goed doen – voor hun bestaande klanten. Ze worden links en rechts ingehaald door nieuwkomers die, met aanpassingen aan de technologie of dienst, nieuwe klanten weten te vinden. Denk aan Apple en Tesla, die respectievelijk de telefoon- en auto-industrie op hun kop zetten. Bedenker Clayton Christensen legt uit hoe dit kan gebeuren, en wat een bedrijf kan doen om hetzelfde lot te ontlopen. Het innovatiedilemma is 'een waarschuwing voor ondernemers die zich onverslaanbaar achten – en een bron van inspiratie voor hen die klaarstaan om ze te verslaan'.

Plunkett's Automobile Industry Almanac 2009 Jack W Plunkett 2008 Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit

fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

Traffic Tom Vanderbilt 2011-06-14 Waarom gaan auto's in de andere rijstrook altijd sneller? Waarom belemmeren verkeerslichten het verkeer? Waarom gebeuren de meeste ongelukken bij warm en droog weer? Waarom staan mensen in de file maar mieren niet? Waar gaan al die mensen toch naartoe? Waarom rijden we zoals we rijden? Traffic analyseert alledaagse verkeerssituaties die automobilisten allemaal kennen: de ergernis over andere automobilisten, de file, de snelle flirt, toeter- en inhaalgedrag (van de anderen uiteraard). Traffic laat op fascinerende én komische wijze zien dat ons rijgedrag veel zegt over ons karakter en dat rijgedrag een uitgelezen mogelijkheid biedt om de menselijke natuur te onderzoeken. Door dit boek gaan we anders naar onszelf kijken, en wie weet maakt dat ons betere automobilisten. Wie Traffic heeft gelezen, zit voorgoed op een andere manier achter het stuur.
