Postkapitalisme Paul Mason 2016-03-24 Het kapitalisme bloeide de afgelopen tweehonderd jaar dankzij zijn aanpassingsvermogen; op de golven van de economie gebaseerd op marktwerking en privaat eigendom te vernietigen. In dit baanbrekende boek laat Mason zien hoe we, vanuit de as van de recente financiële crisis, de kans hebben om een meer sociale, rechtvaardige en duurzame, globale economie te bouwen.

Wij slaven van Suriname Anton de Kom 2020-09-03 'Wij slaven van Suriname' (geschreven in 1934) is het indrukwekkende verhaal over de opstand van slaven in Suriname. Het bracht in de jaren dertig in Nederlandse literaire kringen de pennen behoorlijk in beweging – en na de Tweede Wereldoorlog werd het een symbool voor een onafhankelijk Suriname, ook dankzij het feit dat het werd geschreven door de zoon van een voormalig slaaf. Met dit boek wist Anton de Kom destijds verschillende bevolkingsgroepen bijeen te brengen, en de symbolische betekenis van het werk is even groot als de historische en literaire, wat wel moge blijken uit het feit dat het boek in landen waar het verboden was in groten getale illegaal over de toonbank ging.

A Geography of Pennsylvania Eugene Willard Miller 1995 The culture and economy of Pennsylvania have been developing for more than 300 years. As a consequence, human activities have evolved from those based on primary occupations in the eighteenth century to the manufacturing economy of the nineteenth and early twentieth centuries to the tertiary functions of the late twentieth century. With each major change in economic structure the geographic patterns also changed. The Geography of Pennsylvania charts those changes and provides a spatial analysis of each key geographic function taking place in the state. This book will be an indispensable reference for those who want to understand the factors that shaped Pennsylvania into the dynamic society it is today.

ICSA 2019 Farit Mochamad Afendi 2019-08-02 This conference serves as a means of presenting and discussing various research results among academics, researchers, and practitioners in the fields of statistics, analytics, computing, data science, and its application. Based on 110 papers that have been presented there are three main topics as the focus of the discussion, namely Statistical Modeling, Predictive Analytics, and Pattern Learning. The approach is in the form

of a study to obtain a valid methodology for extracting, collecting, storing, analyzing, and visualizing data including those derived from big data. The application studies cover various fields such as agriculture, climate, energy, industry, business, social, and so on. The conference is expected to be able to provide solutions to various problems in various fields through statistical and analytical approaches.

Mememomics Said Dawlabani 2013-09 From the Foreword by Don Edward Beck, PhD: Books about subjects like economics are rarely written from the perspective of human or cultural evolution. Seldom, if ever, does a reader come across a narrative with pioneering methods that reframe a specialized discipline through a wide-cultural whole systems approach. This is precisely what Said E. Dawlabani does in this revolutionary book, Mememomics: The Next-Generation Economic System. This is a book that reframes the issues of competing economic and political ideologies and places them into an evolutionary new paradigm. This is a book about change done right. It is no secret that today we are dealing with a great political divide that threatens many of our democratic institutions. Right and left ideologies have become polarized camps that seem to be worlds apart.

Managing Open Innovation Technologies Jenny S. Z. Eriksson Lundström 2014-07-08 Open innovation increases the profit of companies and organizations via the input and the adoption of new ideas that are transformed into new processes, products, and services. Yet, how do we ensure that adopters of such innovations focus on relevant problems and use appropriate methods? How should we manage open innovation technologies? How can we exploit distributed knowledge and inventions? And how can we promote them successfully on the market? With valuable lessons to be learned from academic research and industrial experiences of e.g. Intel, Nokia, Philips Healthcare, small municipalities, e-learning platforms and user communities, this book focuses on some of the key dimensions of open innovation and open innovation technologies. It is divided into three themes: theme 1 deals with open innovation as it is in use today, including theoretical underpinnings and lessons from related research fields. Theme 2 analyzes the use of open innovation in organizations today in order to extract best practices. Theme 3 presents forward-looking theoretical research as well as practical future uses of open innovation. Each chapter addresses the particular topics by presenting experiences and results gained in real life projects and/or by empirical research, and clearly states its purpose and how readers are supposed to benefit from it. Overall, the objectives of this book are to advance and disseminate research on systematic open innovation, and to make its results available to practitioners. Thus, the intended target audience includes the international academic community, industrial enterprises, and public authorities.

Business Innovation and Development in Emerging Economies Irwan Trinugroho 2019-05-16 Business innovation driven by the advancement of technology has dramatically changed the business landscape over recent years, not only in advanced countries but also in emerging markets. It is expected that business innovation could help achieve economic inclusion, which has been a global initiative over the last decade, creating opportunities for all people to benefit from the economic development. These proceedings provide an outlet for discussing the importance of business innovation, especially in emerging countries in helping to reach inclusive economies. The papers cover the subject areas management, accounting, finance, economics and social sciences.

Innovation Policy and the Economy 2015 William R. Kerr 2016-04-22 The papers in the sixteenth volume of the National Bureau of Economic Research's Innovation Policy and the Economy offer insights into the changing landscape of innovation by highlighting recent developments in the financing of innovation and entrepreneurship and in the economics of innovation and intellectual property. The first chapter, by Ramana Nanda and Matthew Rhodes-Kropf, explores the process of experimentation in the context of financing of technology start-ups by venture capitalists. The second, by Yael Hochberg, also analyzes the role of entrepreneurial experimentation by systematically examining the rise of start-up accelerators. The third chapter, by Heidi Williams, studies the relationship between the strength of intellectual property rights and innovation. The fourth paper, by Fiona Scott Morton and Carl Shapiro discusses recent changes to the patent system and whether they align the rewards from intellectual property with the marginal contributions made by innovators and other stakeholders. The final chapter, by Karim Lakhani and Kevin Boudreau, focuses on the potential use of field innovation experiments and contests to inform innovation policy and management. Together, these essays continue to highlight the importance of economic theory and empirical analysis in innovation policy research.

The TGW World and its Foundation philosophy of "Focusing on people – learning and growing" Martin Krauss 2022-09-15 Making the world a little bit better and living up to social responsibility through a special entre-preneurial approach: Everyone curious about a particularly sustainable and holistic way of doing

business can come closer to Ludwig Szinicz' dream with this book - in line with the Foundation philosophy of TGW World: "Focusing on people – learning and growing". At the beginning of the current millennium, Ludwig Szinicz laid the cornerstone for his somewhat different future model. At that time, the Diplom-Kaufmann and entrepreneur donated 100 % of his shares in TGW, founded by him and his school friend Heinz König in 1969, to the TGW Future Private Foundation. Together with the two foundation divisions, industrial entrepreneurship and social entrepreneurship, it constitutes the three parts of the TGW World, which are tied together by the Foundation philosophy. Within the TGW World, we follow a special idea: Through a foundation model that fosters stability and sustainability, enabling us to secure the entrepreneurial future of TGW Logistics, our actions are guided by the Foundation philosophy and at the same time make intense non-profit engagement possible. The latter not only links Ludwig Szinicz' matter of heart "education" with the TGW DNA "innovation", but can regardless of company interests as part of the TGW World have an autonomous impact on society. The book focuses on the presentation of the Foundation philosophy and its holistic entrepreneurial approach. Aimed primarily at all people within the TGW World, it provides multifaceted insights into the past and the future through stories, documents, interviews and theory-based perspectives – and can thus serve as an internal reference system. In addition, the "Idea TGW" could be inspiring for people outside the TGW World. About the author: Martin Krauss was a close confidant of the Upper Austrian entrepreneur and founder Ludwig Szinicz (1939 - 2017). In 2013, Ludwig Szinicz appointed the Diplom-Kaufmann and former Siemens manager, who had worked in Germany, Turkey and Austria, to the Foundation Board of TGW Future Private Foundation and the Supervisory Board of TGW Logistics Group GmbH.

21 lessen voor de 21ste eeuw Yuval Noah Harari 2018-08-24 In Sapiens boog Yuval Noah Harari zich over het verleden, in Homo Deus over de toekomst; nu laat hij zijn licht schijnen over het heden. Wat zijn de uitdagingen van onze tijd? Hoe beschermen we onszelf tegen een nucleaire oorlog, ecologische rampen en technologische bedreigingen? Wat is de oorzaak van de opkomst van populistten als Donald Trump? Hoe weren we ons tegen fake news? Moeten we ons voorbereiden op een nieuwe wereldoorlog? Wat moeten we denken van het opkomend nationalisme? Vragen de mondiale problemen die op ons afkomen om andere politieke systemen? Is het een goed idee dat we onze data overdragen aan enkele grote commerciële spelers, of wordt het tijd om het eigendom van data te reguleren? En wat wordt de grote nieuwe wereldmacht, Amerika, Europa of China? In dit boek beantwoordt Yuval Noah Harari de 21 meest urgente vragen van onze tijd.

The Wiley Handbook of Adult Literacy Dolores Perin 2019-08-09 Examines the widespread phenomenon of poor literacy skills in adults across the globe This handbook presents a wide range of research on adults who have low literacy skills. It looks at the cognitive, affective, and motivational factors underlying adult literacy; adult literacy in different countries; and the educational approaches being taken to help improve adults' literacy skills. It includes not only adults enrolled in adult literacy programs, but postsecondary students with low literacy skills, some of whom have reading disabilities. The first section of The Wiley Handbook of Adult Literacy covers issues such as phonological abilities in adults who have not yet learned to read; gender differences in the reading motivation of adults with low literacy skills; literacy skills, academic self-efficacy, and participation in prison education; and more. Chapters on adult literacy, social change and sociocultural factors in South Asia and in Ghana; literacy, numeracy, and self-rated health among U.S. adults; adult literacy programs in Southeastern Europe and Turkey, and a review of family and workplace literacy programs are among the topics featured in the second section. The last part examines how to teach reading and writing to adults with low skills; adults' transition from secondary to postsecondary education; implications for policy, research, and practice in the adult education field; educational technologies that support reading comprehension; and more. Looks at the cognitive processing challenges associated with low literacy in adults Features contributions from a global team of experts in the field Offers writing strategy instruction for low-skilled postsecondary students The Wiley Handbook of Adult Literacy is an excellent book for academic researchers, teacher educators, professional developers, program designers, and graduate students. It's also beneficial to curriculum developers, adult basic education and developmental education instructors, and program administrators, as well as clinicians and counselors who provide services to adults with reading disabilities.

Proceedings of the International Conference on Information Engineering and Applications (IEA) 2012 Zhicai Zhong 2013-04-04 Information engineering and applications is the field of study concerned with constructing information computing, intelligent systems, mathematical models, numerical solution techniques,

and using computers and other electronic devices to analyze and solve natural scientific, social scientific and engineering problems. Information engineering is an important underpinning for techniques used in information and computational science and there are many unresolved problems worth studying. The Proceedings of the 2nd International Conference on Information Engineering and Applications (IEA 2012), which was held in Chongqing, China, from October 26-28, 2012, discusses the most innovative research and developments including technical challenges and social, legal, political, and economic issues. A forum for engineers and scientists in academia, industry, and government, the Proceedings of the 2nd International Conference on Information Engineering and Applications presents ideas, results, works in progress, and experience in all aspects of information engineering and applications.

**Business Darwinism: Evolve or Dissolve** Eric A. Marks 2002-10-15 The survival of the fastest Information technology is now essential to business evolution. Companies that invest in IT as a future resource will live to see the future. The rest won't. The hard reality of the new "Information Darwinism," a term coined by author Eric Marks, is brilliantly and provocatively described in e-Darwinism, a look at the make-or-break impact of IT on accelerating the global struggle for market share. The book offers a compelling look at just how the Internet has transformed business strategy and business strategy creation, IT strategy, and manufacturing strategy for manufacturing and service firms, and made significant inroads in driving revenue enhancement and cost savings as well as reducing a firm's time to market. The book also describes how much the ability to leverage IT has become a requirement for measuring and selecting future leaders.

University-Industry Collaboration Strategies in the Digital Era Günay, Durmuş 2021-01-29 Competitive strategies and higher education-industry collaboration policies are playing a vital role in fostering the reputation and international rankings of higher education institutions. The positive impact of these policies may best be observed in the economic and social outputs of many countries such as the USA, Singapore, South Korea, and European Union (EU) countries such as Belgium, Germany, France, and the Netherlands. However, the number of academic publications that specifically concentrate on the impact of these policies on higher education institutions and authorities remains relatively limited. University-Industry Collaboration Strategies in the Digital Era is an essential research publication that provides comprehensive research on competitive strategies for higher education institutions that will allow them to forge beneficial partnerships with industries that will have a significant impact on their success. Highlighting a wide range of topics such as human resource management, network planning, and institutional structure, this book is ideal for administrators, education professionals, academicians, researchers, policymakers, and students.

terms each Commission proposes up to 2000 binding legal acts and therefore crucially shapes EU policy, which in turn impacts on the daily lives of more than 500 million European citizens. However, despite the Commissions key role in setting the agenda for European decision making, little is known about its internal dynamics when preparing legislation. This book provides a problem-driven, theoretically-founded, and empirically rich treatment of the so far still understudied process of position-formation inside the European Commission. It reveals that various internal political positions prevail and that the role of power and conflict inside the European Commission is essential to understanding its policy proposals. Opening the 'black box' of the Commission, the book identifies three ideal types of internal position-formation. The Commission is motivated by technocratic problem-solving, by competence-seeking utility maximization or ideologically-motivated policyseeking. Specifying conditions that favor one logic over the others, the typology furthers understanding of how the EU system functions and provides novel explanations of EU policies with substantial societal implications.

China's Middle Class Li Youmei 2021-05-12 This book is a collection of empirical studies on China's middle class from top-ranking Chinese sociologists, discussing this newly identified social stratum with regard to the basic concept and scope of the group, its functions, formation, identity, consumption, behavior patterns and value system. As the first study of its kind, the analysis of most chapters is based on a rich body of empirical data gathered from rigorous large-scale surveys designed specifically for the Chinese middle class across megacities including Beijing, Shanghai and Guangzhou. The book traces the complex and dynamic formation process of China's middle class from different perspectives while dealing with issues of social concern such as "rigid social stratification". The findings shed light on the underlying logic of structural change in Chinese society over several recent decades, with significant policy implications. The book will attract sociologists, students and policymakers interested in social structure, social transformation and middle-income groups in China.

Abriendo caminos en la prospectiva para el desarrollo de América Latina Medina Vásquez, Javier Enrique 2020-08-25 Este libro busca contribuir a la formación de profesionales en estudios del futuro y prospectiva, en el contexto de América Latina y el Caribe. Se trata de una reflexión acerca del desarrollo de las capacidades prospectivas que requiere la región sobre anticipación, pensamiento estratégico, innovación y solución de problemas complejos, con miras a fortalecer un Estado Activo y una sociedad responsable capaz de enfrentar los grandes desafíos del entorno mundial en el horizonte temporal 2030-2050. Este conocimiento es esencial para la adopción de decisiones estratégicas y la aceleración de respuestas innovadoras y oportunas, con miras al cierre de las crecientes brechas propias de la revolución industrial 4.0 y las sociedades del conocimiento y el aprendizaje. El autor posee 30 años de experiencia en este campo y una constante interacción con públicos estratégicos en la región, tales como los organismos nacionales de planificación, los organismos nacionales de ciencia, tecnología e innovación; decisores y actores del desarrollo empresarial, sectorial y territorial. En particular, la Comisión Económica para América Latina y el Caribe (CEPAL), el Instituto Latinoamericano y del Caribe de Planificación Económica y Social (ILPES), el Programa de Ciencia y Tecnología para el Desarrollo de la Cooperación Iberoamericana (CYTED), la Comisión de Ciencia y Tecnología de la Organización de Estados Americanos (OEA), la Comisión Europea y el Programa de Alto Gobierno de la Escuela Superior de Administración Pública de Colombia (ESAP).

Innovative approaches in the business world Nezihe Tüfekçi 2018-01-01

Ciencia, tecnología y startups Pere Condom-Vilà 2020-09-21 La innovación tecnológica descansa sobre tres pilares: investigación pública, empresas y startups, que a su vez son las bases del nuevo desarrollo económico. Este libro explica cómo se crea la tecnología, cómo evoluciona, para qué la usamos, hacia dónde se dirige y qué podemos esperar de ella. Quienes investigan y transfieren conocimiento —tanto en el sector público como en el privado— reconocerán en estas páginas los fundamentos de su oficio; los directivos empresariales descubrirán nuevas fuentes de progreso, propias del siglo XXI; aquellos que definen las políticas públicas hallarán información valiosa sobre geografía de la ciencia y otros aspectos útiles para la gestión que desempeñan. Ciencia, tecnología y «startups» se cierra con una mirada al futuro que anuncia que el internet del pensamiento está próximo y que la tecnología permitirá mucho más.

Research Anthology on Edge Computing Protocols, Applications, and Integration Management Association, Information Resources 2022-04-01 Edge

computing is quickly becoming an important technology throughout a number of fields as businesses and industries alike embrace the benefits it can have in their companies. The streamlining of data is crucial for the development and evolution of businesses in order to keep up with competition and improve functions overall. In order to appropriately utilize edge computing to its full potential, further study is required to examine the potential pitfalls and opportunities of this innovative technology. The Research Anthology on Edge Computing Protocols, Applications, and Integration establishes critical research on the current uses, innovations, and challenges of edge computing across disciplines. The text highlights the history of edge computing and how it has been adapted over time to improve industries. Covering a range of topics such as bandwidth, data centers, and security, this major reference work is ideal for industry professionals, computer scientists, engineers, practitioners, researchers, academicians, scholars, instructors, and students.

The Fairshare Model Karl Sjogren 2019-04-25 The Fairshare Model is an idea for a performance-based capital structure that redefines capitalism at the DNA level, where ownership interests are set. When used to raise venture capital via an IPO, it balances and aligns the interests of investors and employees--capital and labor. Author Karl Sjogren utilizes highly approachable language, humor, and analogies, along with insights about capital markets. The result is an eclectic, yet inviting discussion that might occur in a graduate-level symposium on economics, finance, and philosophy. This groundbreaking book focuses on startup valuations--microeconomics. But it also considers the macroeconomic implications of the Fairshare Model for economic growth, income inequality, and shared stakeholding, as well as game theory and financing of blockchain projects. The Fairshare Model has two classes of stock--both vote but only one is tradable. --Investors get the tradable stock. Employees get it too, for actual performance. --For future performance, employees get the non-tradable stock; it converts to the tradable stock based on milestones. With this structure, public investors are more likely to profit when they invest in a company with high failure risk--because they have less valuation risk. By offering a better form of capitalism, The Fairshare Model is a movement book for our times.
