Critical Perspectives on International Education Yvonne Hébert 2013-02-11 In rapidly globalizing spaces of life, any research project on international education would necessarily have multi-directional emphases, with the quality of observations and analyses reflecting the expanding political, economic and cultural intersections which characterize this potentially promising century. To respond to these emerging learning and living contexts of our world, this book brings together some of the most active and established scholars in the field. As such, the book represents important epistemic interventions that analyze and critique the institutional, socio-economic, linguistic and pedagogical platforms of international education. As the locus of international education cannot be detached from the pragmatics of social development, the specific recommendations embedded in this book expand the debates and broaden the boundaries of learning projects that should enhance the lives of people, especially those who are continually marginalized by the regimes of globalization. Thus, the book actively advocates for possibilities of human well-beings via different formats of education in diverse locations of life. "Critical Perspectives on International Education offers a historically comprehensive, intellectually honest, and perspective-rich scholarly exploration of a new education-globalization dynamic. This book courageously offers up diverse voices, gathered into a robust and useful conversation regarding global education. This book adds greatly to understanding why educational marketplaces must be driven by principles and practices that empower diverse peoples, to secure sustainable knowledge benefits that contribute to personal, local, national and international well-being. This critical perspective reader will engage scholars, researchers and citizens." Jim Paul, University of Calgary "In the current intensifications of globalization and its resulting inequalities, it is crucial to better understand the role of knowledge creation and knowledge dissemination. Should knowledge be only a commodity to be sold in the market and a tool to increase economic capital, or should it be a shared sociocultural capital aimed at improving democracy and the common good? In Critical Perspectives on International Education, Yvonne Hébert and Ali A. Abdi assemble an impressive array of contributions from all over the world that address this question from a variety of critical perspectives and case studies. I recommend this book to everyone interested in the connections between education, citizenship development and human well-being." Daniel Schugurensky, Arizona State University

English Medium Instruction in Higher Education in Asia-Pacific Ben Fenton-Smith 2017-03-19 This volume draws together the viewpoints and research findings of leading scholars and informed local practitioner-researchers throughout Asia-Pacific about the issues and challenges of English as a medium of instruction (EMI) at higher education institutions in that region. Specifically, it addresses four key themes: Macro-level EMI policy and practice; institutional implications for pedagogy; stakeholder perceptions of EMI; and challenges of interpersonal interaction in EMI contexts. The book is among the first to critically examine the emerging global phenomenon of English as a medium of instruction, and the first title to exclusively explore Asia-Pacific tertiary contexts. It will be of particular interest to policy-makers in international education and tertiary educators seeking blueprints for practice, as well as scholars and postgraduate students of English as a lingua franca, English for academic purposes, academic language and learning, and language education in Asia-Pacific.

The Paradox of Skills Linda Anne Barkas 2011-11-13 The objectives underpinning the policies to expand and widen participation have impacted on university provision to help students improve their general literacy and academic writing skills. This book examines how and why Students' Skills Centres, (SSCs), gained such a hold in the sector, despite the contentious nature of the research evidence that challenges the notion of the applicability of generic writing skills. It is argued in the book, that on a small scale, SSCs illustrate the paradoxes and ironies that have developed in higher education. '

English for Vocational Purposes Averil Coxhead 2019-09-12 English for Vocational Purposes provides a linguistic description of English in the context of the trades and investigates how this specialist language is used in real-world contexts. As the demand for English-speaking workers in the trades grows internationally, a major

gap in the research on language in the trades is evident. Based on courses in construction and engineering at a polytechnic in New Zealand, this book offers an empirical response to this gap in research. Features of this book include: new research on linguistic features of written and spoken texts in trades education, with a special focus on discourse, visual elements of written texts and vocabulary; real-life examples of the language in context, along with implications for teaching and learning and a chapter devoted to putting research findings into practice; qualitative and quantitative data to support examples and shed light on the most complex aspects of English as a trades language; supplementary material online which includes technical word lists in areas of carpentry, plumbing, automotive technology and fabrication (welding). Paving the way for a new research agenda in the field of ESP, English for Vocational Purposes is key reading for advanced students, researchers and practitioners in the areas of ESP, trades education and vocational education.

The Preparation of Teachers of English as an Additional Language around the World Nihat Polat 2021-08-09 This book fills a critical gap in a neglected area in current educational research: international teacher education. It focuses on the preparation of teachers of English as an additional language (EAL) in several world regions. The book consists of chapters by researchers in well-established teacher education programs in 11 countries: Brazil, Canada, China, Finland, Greece, New Zealand, Russia, Saudi Arabia, South Korea, Turkey and the United States of America. It takes a cross-national, comparative approach around four major focus areas: policy, research, curriculum and practice, offering critical implications that can help improve EAL teacher education programs in different parts of the world. Teacher education is an area that has great potential for international cross-pollination of ideas and actions, and this book represents an important first step along this road.
