Beyond Databases, Architectures and Structures. Paving the Road to Smart Data Processing and Analysis Stanisław Kozielski 2019-05-07 This book constitutes the refereed proceedings of the 15th International Conference entitled Beyond Databases, Architectures and Structures, BDAS 2019, held in Ustroń, Poland, in May 2019. It consists of 26 carefully reviewed papers selected from 69 submissions. The papers are organized in topical sections, namely big data and cloud computing; architectures, structures and algorithms for efficient data processing and analysis; artificial intelligence, data mining and knowledge discovery; image analysis and multimedia mining; bioinformatics and biomedical data analysis; industrial applications; networks and security.

Biometric-Based Physical and Cybersecurity Systems Mohammad S. Obaidat 2018-10-24 This book presents the latest developments in biometrics technologies and reports on new approaches, methods, findings, and technologies developed or being developed by the research community and the industry. The book focuses on introducing fundamental principles and concepts of key enabling technologies for biometric systems applied for both physical and cyber security. The authors disseminate recent research and developing efforts in this area, investigate related trends and challenges, and present case studies and examples such as fingerprint, face, iris, retina, keystroke dynamics, and voice applications. The authors also investigate the advances and future outcomes in research and development in biometric security systems. The book is applicable to students, instructors, researchers, industry practitioners, and related government agencies staff. Each chapter is accompanied by a set of PowerPoint slides for use by instructors.

Educational Technology Ronghuai Huang 2019-02-27 The aim of this book is to prepare students with knowledge and skills to understand the organizational needs and requirements of educational technology. Students should be able to use and manage both existing and emerging technologies effectively and be able to apply associated pedagogies to suit the environment, but also evaluate and manage technological advances of future and the requisite pedagogical shifts to achieve efficiency and effectiveness. The demand of educational technology has been rising steadily, primarily due to the fact that e-learning is a huge and significantly expanding world-wide industry. Commercial e-learning companies, training departments in large companies and organizations, computer software companies and educational institutions the world over employ large numbers of educational technology specialists. There is a strong demand for technologists who understand educational theories and for instructional designers and teachers who understand technologies. This book is targeted towards those who are looking for career in educational technology, instructional design, or media and information systems, or may want to continue their studies in graduate programs in learning and instructional technology, and those who are interested in becoming teacher in K-12 setting but need background in educational technology. This book will also act as a valuable resource in teacher education programs where primary focus on mainstream education and requires an authentic resource in instructional design and educational technology. Keeping in mind the varied needs of the organizations, employees and potential students, this book adopts a competency approach to learning and assessment. The themes and topics take a multi-disciplinary approach, and are aimed at preparing students for competent and innovative educational technology professionals.

De lange weg naar de vrijheid Nelson Mandela 2017-10-21 De lange weg naar de vrijheid is de beroemde autobiografie van een van de grootste mannen van de twintigste eeuw. Nelson Mandela beschrijft de lange weg die hij heeft moeten afleggen van onwetende jongen tot charismatisch staatsman. Dit is het verhaal van misschien wel de wonderbaarlijkste omwenteling in de geschiedenis, verteld door de man die het allemaal heeft meegemaakt en in gang gezet. Het verhaal van Mandela, door Mandela. 9th International Workshop on Spoken Dialogue System Technology Luis Fernando D'Haro 2019-09-24 This book presents the outcomes of the 9th International Workshop on Spoken Dialogue Systems (IWSDS), "Towards creating more human-like conversational agent technologies". It compiles and provides a synopsis of current global research to push forward the state of the art in dialogue technologies, including advances in the context of the classical problems of language understanding, dialogue management and language generation, as well as cognitive topics related to the human nature of conversational phenomena, such as humor, empathy and social context understanding and awareness.

Sanjeevani - December 2020 Edition (English) Sanjeevani, Contribution from multiple reporters and writers 2020-07-15 Sanjeevani health, wellness, and fitness magazine is the first publication of TDO Nepal. With this newest member of the TDO Nepal family, we aim to reach more people with simple and accurate information. We are thankful to all our patrons and contributors. Edition: 1 Published Date: 15th July 2020 Table of Content: Cover Story: 1.Overview of health in Nepal 2. Covid-19 in Nepal, a summary of last three months 3. Fitness Trackers - Your mini personal trainers 4. God of Sight, Dr. Ruit Other Articles: 5. Interview with former Miss Nepal and her thoughts on healthy living 6. Acute Gastroenteritis 7. Garcinia Cambogia 8. Top Doctor speaks on food supplements 9. What is Uterine Prolapse? Its causes, symptoms & more 10. Top Doctor speaks on Uterine Prolapse 11. A checkup can tell your inside story 12. Health Astrology, 2020

Computational Science – ICCS 2020 Valeria V. Krzhizhanovskaya 2020-06-18 The seven-volume set LNCS 12137, 12138, 12139, 12140, 12141, 12142, and 12143 constitutes the proceedings of the 20th International Conference on Computational Science, ICCS 2020, held in Amsterdam, The Netherlands, in June 2020.* The total of 101 papers and 248 workshop papers presented in this book set were carefully reviewed and selected from 719 submissions (230 submissions to the main track and 489 submissions

to the workshops). The papers were organized in topical sections named: Part I: ICCS Main Track Part II: ICCS Main Track Part III: Track of Advances in High-Performance Computational Earth Sciences: Applications and Frameworks; Track of Agent-Based Simulations, Adaptive Algorithms and Solvers; Track of Applications of Computational Methods in Artificial Intelligence and Machine Learning; Track of Biomedical and Bioinformatics Challenges for Computer Science Part IV: Track of Classifier Learning from Difficult Data; Track of Complex Social Systems through the Lens of Computational Science; Track of Computational Health; Track of Computational Methods for Emerging Problems in (Dis-)Information Analysis Part V: Track of Computational Optimization, Modelling and Simulation; Track of Computational Science in IoT and Smart Systems; Track of Computer Graphics, Image Processing and Artificial Intelligence Part VI: Track of Data Driven Computational Sciences; Track of Machine Learning and Data Assimilation for Dynamical Systems; Track of Meshfree Methods in Computational Sciences; Track of Multiscale Modelling and Simulation; Track of Quantum Computing Workshop Part VII: Track of Simulations of Flow and Transport: Modeling, Algorithms and Computation; Track of Smart Systems: Bringing Together Computer Vision, Sensor Networks and Machine Learning; Track of Software Engineering for Computational Science; Track of Solving Problems with Uncertainties; Track of Teaching Computational Science; Track of UNcertainty QUantificatiOn for ComputationAI modeLS *The conference was canceled due to the COVID-19 pandemic.

Patient Functional Ability Improves Following Total Knee Arthroplasty But Pre-Operative Activity Pattern Remains 2017

INTRODUCTION: A key facet of patient outcome following total knee arthroplasty is the restoration of physical function. Various methods can be used to measure this outcome; Patient reported outcome measures (PROMs), or more direct evaluations of strength assessments, timed activities, or biometric measurements. More recently activity monitors have been employed as an effective way to capture patients function without the reliance of clinic or laboratory based assessments. There is however little understanding of the interrelationship between these various ways of measuring the patient's ability to perform physical activity. Our aim was to evaluate the effectiveness of take-home activity monitoring devices and how the functional metric of step-count correlated with established clinic-based functional assessments of outcome. **METHODS:** Following local approvals, 20 patients due to undergo primary TKA were prospectively recruited and consented to attend pre- and post-op research clinics. Data were recorded at four time points; pre-operation, 6-, 12-, and 26-weeks post-operation. Patient functional activity levels were monitored with a battery of functional metrics. Lower limb power output was assessed with the Leg Extensor Power Rig (Nottingham, UK), reported as a ratio of control limb acting as an internal control. Timed functional performance was assessed with the Aggregated Locomotor Function (ALF) score, a composite of walking, chair transfer and stair climb (lower scores highlight superior function). Patient reported function was assessed with the Knee injury and Osteoarthritis Outcome Score Activities of Daily Living sub-score (KOOS ADL). Multiday activity monitoring devices (Xiaomi MiBand 2) counted steps over 3 consecutive days and were reported as a daily average value. Analysis was by Two-way ANOVA and Correlation Coefficients, with statistical significance accepted at 0.05. **RESULTS:** Compared to pre-op, by 26 weeks patients had made significant improvements in proportional lower limb power (mean change 69% to 96%; p

Entrepreneurship in the Asia-Pacific: Case Studies Jing Wang 2019-09-23 This book is dedicated to the analysis of the entrepreneurship in successful companies by presenting and comparing a series of case studies in the Asia-Pacific where many new companies have been growing successfully in the 21st century. In total, 5 cases in the manufacturing industry, 4 cases in the services industry, and 3 cases related to new business and social innovation are chosen from The mainland of China, Taiwan, Japan, Australia, Malaysia and Vietnam. Each case provides insight into the entrepreneur's aspiration, the processes of personal and business developments, the factors of success, and the inspirations drawn from the analysis. These cases are analyzed and compared from the viewpoints of entrepreneur's motivation, ability of foreseeing changes and opportunities in the future business environment, core resources and innovation, knowledge management and culture for the company, determination and ethos. These are critical factors in value creation for customers and the society, especially in the future business environment. Finally, commonalities and uniquenesses in entrepreneurship relevant to industry sectors and social-economic-cultural contexts are clarified and a typical entrepreneurship model in the Asia-Pacific is proposed.

Internet of Things, Infrastructures and Mobile Applications Michael E. Auer 2020-09-10 This book gathers papers on interactive and collaborative mobile learning environments, assessment, evaluation and research methods in mobile learning, mobile learning models, theory and pedagogy, open and distance mobile learning, life-long and informal learning using mobile devices, wearables and the Internet of Things, game-based learning, dynamic learning experiences, mobile systems and services for opening up education, mobile healthcare and training, case studies on mobile learning, and 5G network infrastructure. Today, interactive mobile technologies have become the core of many—if not all—fields of society. Not only do the younger generation of students expect a mobile working and learning environment, but also the new ideas, technologies and solutions introduced on a nearly daily basis also boost this trend. Discussing and assessing key trends in the mobile field were the primary aims of the 13th International Conference on Interactive Mobile Communication Technologies and Learning (IMCL2019), which was held in Thessaloniki, Greece, from 31 October to 01 November 2019. Since being founded in 2006, the conference has been devoted to new approaches in interactive mobile technologies, with a focus on learning. The IMCL conferences have since become a central forum of the exchange of new research results and relevant trends, as well as best practices. The book's intended readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, schoolteachers, further education lecturers, practitioners in the learning industry, etc.

Wireless Mobile Communication and Healthcare Juan Ye 2021-02-20 This book constitutes the refereed post-conference proceedings of the 9th International Conference on Mobile Communication and Healthcare, MobiHealth 2020, held in December 2020. Due to Covid-19 pandemic the conference was held virtually. The book contains 13 full papers selected from the main conference and 10 full papers from two workshops on medical artificial intelligence and on digital healthcare technologies. The conference papers are organized in topical sections on wearable technologies; health telemetry; mobile sensing and assessment; machine learning in eHealth applications.

Human Aspects of IT for the Aged Population. Technologies, Design and User Experience Qin Gao 2020-07-10 This three volume set of LNCS 12207, 12208 and 12209 constitutes the refereed proceedings of the 6th International Conference on Human Aspects of IT for the Aged Population, ITAP 2020, held as part of the 22nd International Conference, HCI International 2020, which took place in Copenhagen, Denmark, in July 2020. The conference was held virtually due to the COVID-19 pandemic. The total of 1439 papers and 238 posters have been accepted for publication in the HCI 2020 proceedings from a total of 6326 submissions. ITAP 2020 includes a total of 104 regular papers which are organized in topical sections named: Involving Older Adults in HCI

Methodology , User Experience and Aging, Aging and Mobile and Wearable Devices, Health and Rehabilitation Technologies, Well-being, Persuasion, Health Education and Cognitive Support, Aging in Place, Cultural and Entertainment Experiences for Older Adults, Aging and Social Media, Technology Acceptance and Societal Impact.

Smart Objects and Technologies for Social Good Barbara Guidi 2018-03-02 This book constitutes the refereed proceedings of the Third EAI International Conference on Smart Objects and Technologies for Social Good, GOODTECHS 2017, held in Pisa, Italy, November 29-30, 2017. The 38 revised full papers presented were carefully reviewed and selected from 70 submissions. The papers reflect the design, implementation, deployment, operation and evaluation of smart objects and technologies for social good. A social good can be understood as a service that benefits a large number of people in a most possible way. Some classic examples are healthcare, safety, environment, democracy, and human rights, or even art, entertainment, and communication.

Cybernetics Approaches in Intelligent Systems Radek Silhavy 2017-09-04 This book discusses new approaches and methods in the cybernetics, algorithms and software engineering in the scope of the intelligent systems. It brings new approaches and methods to real-world problems and exploratory research that describes novel approaches in the cybernetics, algorithms and software engineering in the scope of the intelligent systems. This book constitutes the refereed proceedings of the Computational Methods in Systems and Software 2017, a conference that provided an international forum for the discussion of the latest high-quality research results in all areas related to computational methods, statistics, cybernetics and software engineering.

Computational Collective Intelligence Ngoc Thanh Nguyen 2019-10-04 This two-volume set (LNAI 11683 and LNAI 11684) constitutes the refereed proceedings of the 11th International Conference on Computational Collective Intelligence, ICCCI 2019, held in Hendaye France, in September 2019. The 117 full papers presented were carefully reviewed and selected from 200 submissions. The papers are grouped in topical sections on: computational collective intelligence and natural language processing; machine learning in real-world data; distributed collective intelligence for smart manufacturing; collective intelligence for science and technology; intelligent management information systems; intelligent sustainable smart cities; new trends and challenges in education: the university 4.0; intelligent processing of multimedia in web systems; and big data streaming, applications and security. Computational Intelligence and Its Applications in Healthcare Jitendra Kumar Verma 2020-08-01 Computational Intelligence and Its Applications in Healthcare presents rapidly growing applications of computational intelligence for healthcare systems, including intelligent synthetic characters, man-machine interface, menu generators, user acceptance analysis, pictures archiving, and communication systems. Computational intelligence is the study of the design of intelligent agents, which are systems that act intelligently: they do what they think are appropriate for their circumstances and goals; they're flexible to changing environments and goals; they learn from experience; and they make appropriate choices given perceptual limitations and finite computation. Computational intelligence paradigms offer many advantages in maintaining and enhancing the field of healthcare. Provides coverage of fuzzy logic, neural networks, evolutionary computation, learning theory, probabilistic methods, telemedicine, and robotics applications Includes coverage of artificial intelligence and biological applications, soft computing, image and signal processing, and genetic algorithms Presents the latest developments in computational methods in healthcare Bridges the gap between obsolete literature and current literature

Intelligent Environments 2019 A. Muñoz 2019-08-06 Intelligent Environments (IEs) aim to empower users by enriching their experience, raising their awareness and enhancing their management of their surroundings. The term IE is used to describe the physical spaces where ICT and pervasive technologies are used to achieve specific objectives for the user and/or the environment. The growing IE community, from academia to practitioners, is working on the materialization of IEs driven by the latest technological developments and innovative ideas. This book presents the proceedings of the workshops held in conjunction with the 15th International Conference on Intelligent Environments (IE'19), Rabat, Morocco, 24 – 27 June 2019. The conference focused on the development of advanced intelligent environments, as well as newly emerging and rapidly evolving topics. The workshops included here emphasize multi-disciplinary and transversal aspects of IEs, as well as cutting-edge topics: the 8th International Workshop on the Reliability of Intelligent Environments (WORIE'19); 9th International Workshop on Intelligent Environments Supporting Healthcare and Well-being (WISHWell'19); 5th Symposium on Future Intelligent Educational Environments and Learning (SOFIEE'19); 3rd International Workshop on Intelligent Systems for Agriculture Production and Environment Protection (ISAPEP'19); 3rd International Workshop on Legal Issues in Intelligent Environments (LIIE'19); 1st International Workshop on Intelligent Environments and Buildings (IEB'19); 3rd International Workshop on Citizen-Centric Smart Cities Services (CCSCS'19); and the 4th International Workshop on Smart Sensing Systems (IWSSS'19). The book will be of interest to all those whose work involves the design or application of Intelligent Environments.

Tendencias en Investigación Clínica Galo Peralta Fernández 2021-11-08 Obra multidisciplinar, desarrollada por personal experimentado que revisa los principales retos de la investigación desde la perspectiva de diferentes especialidades clínicas, sus peculiaridades, los principales desarrollos que están en marcha, las bases fisiopatológicas que sustentan los esfuerzos actuales en algunas disciplinas médicas, las dianas terapéuticas que se piensan en la actualidad que pueden ser claves, y algunos resultados preliminares de diversos estudios. También presentan los retos en el uso de los datos, la complejidad del equilibrio entre la experimentación y el respeto máximo al paciente, conceptos relacionados con las estructuras de soporte en investigación clínica, etc. todo ello reconociendo la volatilidad del conocimiento médico en desarrollo.

Emerging Research in Data Engineering Systems and Computer Communications P. Venkata Krishna 2020-02-10 This book gathers selected papers presented at the 2nd International Conference on Computing, Communications and Data Engineering, held at Sri Padmavati Mahila Visvavidyalayam, Tirupati, India from 1 to 2 Feb 2019. Chiefly discussing major issues and challenges in data engineering systems and computer communications, the topics covered include wireless systems and IoT, machine learning, optimization, control, statistics, and social computing.

Computational Science – ICCS 2019 João M. F. Rodrigues 2019-06-07 The five-volume set LNCS 11536, 11537, 11538, 11539 and 11540 constitutes the proceedings of the 19th International Conference on Computational Science, ICCS 2019, held in Faro, Portugal, in June 2019. The total of 65 full papers and 168 workshop papers presented in this book set were carefully reviewed and selected from 573 submissions (228 submissions to the main track and 345 submissions to the workshops). The papers were organized in topical sections named: Part I: ICCS Main Track Part II: ICCS Main Track; Track of Advances in High-Performance Computational Earth Sciences: Applications and Frameworks; Track of Agent-Based Simulations, Adaptive Algorithms and Solvers;
