The Chaos Theory of Careers Robert Pryor 2011-05-10 The Chaos Theory of Careers outlines the application of chaos theory to the field of career development. It draws together and extends the work that the authors have been doing over the last 8 to 10 years. This text represents a new perspective on the nature of career development. It emphasizes the dimensions of careers frequently neglected by contemporary accounts of careers such as the challenges and opportunities of uncertainty, the interconnectedness of current life and the potential for information overload, career wisdom as a response to unplanned change, new approaches to vocational assessment based on emergent thinking, the place of spirituality and the search for meaning and purpose in, with and through work, the integration of being and becoming as dimensions of career development. It will be vital reading for all those working in and studying career development, either at advanced undergraduate or postgraduate level and provides a new and refreshing approach to this fast changing subject. Key themes include: Factors such as complexity, change, and contribution People's aspirations in relation to work and personal fulfilment Contemporary realities of career choice, career development and the working world

The Routledge Companion to Career Studies Hugh Gunz 2019-11-12 The Routledge Companion to Career Studies is an in-depth reference for researchers, students, and practitioners looking for a comprehensive overview of the state of the art of career studies. Split into five parts, the volume looks at major areas of research within career studies and reflects on the latest developments in the areas of theory, empirical studies, and methodology. The book's five parts cover (1) major theoretical and methodological debates and approaches to studying careers; (2) careers as dynamic, ongoing processes covering such issues as time, shaping careers, career outcomes and patterns, and the forces shaping careers; (3) the local, national, and global context of careers, (4) implementing career research to design practical interventions in areas such as education, counseling, and national policy; and (5) a commentary on the current state of career scholarship and its future development as represented in this volume, by founding scholars in the field. This book will be a sourcebook for scholars studying careers, research students intending to take up the study of careers, and anyone – scholars and practitioners – with an interest not only in understanding careers, the factors shaping them and where they lead, but also in how this understanding might be used in practice.

Career Patterns in Social Work Dorothy Bell 1955

The Criminal Career Britta Kyvsgaard 2002-11-14 How can the average 'criminal career' be characterized and how common are career criminals? Does offending become more specialized and/or more serious as people get older? Do female careers in crime differ from those of males in substance or only in magnitude? Britta Kyvsgaard examines these questions through her longitudinal analysis of the life circumstances and criminal pursuits of 45,000 Danish offenders. This 2002 book provides a remarkably broad assessment of the full spectrum of criminal career patterns. The data, unparalleled in size and quality, allows powerful analyses of criminal behavior, even among relatively small demographic subgroups. Kyvsgaard is thus able to make solid assessments of offending patterns for males and females, juveniles and middle-aged adults, and employed and unemployed individuals. Furthermore, she examines the empirical evidence of the effects of deterrence and incapacitation. Her findings suggest rehabilitation as an alternative worthy of further research.

Qualitative Research in Tourism Jenny Phillimore 2004 Whilst qualitative approaches are beginning to be more commonly used and accepted in tourism, discussions of research methods have rarely moved beyond practical considerations. Limited attention given to the underlying philosophical and theoretical underpinnings that influence the research process. This book links the theory with research practice, to offer a more holistic account of how qualitative research can be used in tourism.

New perspectives on career counseling and guidance in Europe Valérie Cohen-Scali 2017-10-11 In industrialized societies, individuals are facing major challenges that mobilize many of their psychological and social resources. The world of work is changing constantly. Adults have to adapt their technical skills and knowledge continuously. For teenagers and young adults, choosing a vocation and constructing their future career paths is becoming increasingly difficult. The migration of people and the globalization of the workforce raise questions about social inclusion and the future of affected individuals. These examples highlight the importance of the field of Career Counseling and Guidance to support citizens individually and collectively in building their future. The challenges our societies face demonstrate how crucial the development of research in this field is. The European Doctoral Programme in Career Guidance and Counselling (ECADOC), funded by the European Commission from 2013-2016, has brought together PhD students working on burning issues in this field, using various theoretical references and methodologies. The four parts of this book present a selection of innovative research aiming to find answers to the named challenges. Part 1 deals with key psychological processes involved in career construction of young adults. Part 2 presents research concerning transitions over the course of life. Part 3 covers research related to interventions of career guidance and counseling. Part 4 outlines perspectives for the future and proposes a European Research Agenda for our field of research. Perspectives on Current Research in Career Guidance and Counseling – Building Careers in Changing and Diverse Societies is dedicated to students, researchers and practitioners in the fields of education, career guidance, psychology, human resource management to inform them about very recent work and promote the development of innovative interventions and programmes.

Criminal Careers of a Sub-set of Offenders in Barbados Eleanor Gittens 2011 The research in this thesis built on several papers that have brought criminal career research to the forefront of the scientific and empirical study of criminal behaviour. However, most existing research has been limited in scope and confined to a relatively small range of samples from more developed, first world, countries; in particular, the USA, the UK, and Canada. The main aim of the present research, therefore, was to replicate and extend previous work on criminal careers using a sample of offenders from a developing nation, Barbados. Given the limitations of previous work, the present research not only examined a number of key variables previously identified in relation to criminal careers (onset age, career length, chronicity, versatility, and seriousness), but also extended the investigation to look at issues surrounding specialisation, violence and demographic factors as related to criminal careers. The sample consisted of 1692 offenders who were charged in Barbados during 2002 and 2006 for robbery and sex offences and during 2006 for drug offences. Several important findings emerged. In particular, there was a significant negative relationship between onset age and the other criminal career variables, the latter of which were positively correlated with each other; this supports the idea of a general factor underlying criminal careers. Nevertheless, there were also variations according to different types of offences. Thus, on average, sex and drug offenders had the shortest career lengths and showed the least versatility and the lowest levels of chronicity and seriousness. In contrast, burglary offenders had the longest career lengths, the earliest age of onset, the greatest versatility, and committed the most serious crimes. In addition, contrary to the findings of some previous studies, there was evidence of specialisation in the sample, and specialists had an earlier age of onset, longer careers, lower versatility and lower levels of crime seriousness than non-specialists. Violent offenders showed a similar pattern of earlier age of onset, longer careers, greater versatility and higher levels of chronicity and seriousness than non-violent offenders. Finally, there were some differences according to gender, race, housing area, employment type and educational level for the key criminal career variables. The results of the research are discussed in terms of their comparability with previous research in the field from more developed nations. Despite some interesting discrepancies, it is argued that, in general, the criminal career findings of the present sample are remarkably similar to previous findings from other countries; however, this could be a feature of the particular historical background of Barbados. Other implications for criminal career research, including practical applications, are also discussed, as well as directions for future research.

Seeking Challenge in the Career S. Gayle Baugh 2018-06-01 The Research in Careers series is designed in five volumes to provide scholars a unique forum to examine careers issues in today's changing, global workplace. What makes this series unique is that the volumes are connected by the use of Mainiero and Sullivan's (2006) Kaleidoscope Career Model (KCM) as the organizing framework and the theme underlying the volumes. In Volume 4 of the Research in Careers series, the authors explore the influence of challenge on career development and career outcomes. The contributors investigate career challenge in different national contexts (e.g., India) and in different career fields (e.g., entrepreneurship, nursing) and for different groups (nurses, Millennials). The outcomes studied include career satisfaction, leadership skills, and occupational expertise. Finally, negative effects of challenge are suggested.

The New Careers Michael Arthur 1999-07-28 `To career used to mean to swerve wildly or to go swiftly. In this beautifully argued, richly documented, original, liberating work, Arthur, Inksen, and Pringle demonstrate that the new careers once more are about swift swerves, unexpected agency, and enacted opportunities and constraints. Readers will think about the future in ways they never imagined possible. This is a good book. People need to get it in their hands to see how good it is? - Karl Weick, University of Michigan The New Careers offers a major new approach to the concept of career and the relation of the individual to the contemporary workplace. It shows that our traditional conceptions of careers are rooted in the stable conditions of the Industrial State model which has dominated the Twentieth century and that new models, better attuned to the New Economy of the later Twentieth and early Twenty-first centuries are now needed. The book points to careers as actions rather than structures, as a means of learning rather than means of earning, and as boundaryless entities rather than constrained ones. It also points to the return of the career as a key concept in social analysis, but shows that in the light of new phenomena, the `career? as we traditionally know it will never be the same again. This innovative and accessible book is based on work for which Michael Arthur, Kerr Inkson and Judith Pringle won the Academy of Management prize for best section paper, which forms the core of this book.

Career Planning for Research Bioscientists Sarah Blackford 2012-09-10 Career Planning for Research Bioscientists is an essential careers guide for bioscience doctoral students and postdoctoral researchers. It contains a wealth of information and resources specifically targeted at research bioscientists, with practical strategies to enhance career success in an increasingly competitive job

Careers in Clinical Research Institute of Medicine 1994-02-01 Transforming biological discoveries into medical treatment calls for a cadre of health professionals skilled in patient-oriented research. Yet many factors discourage talented persons from choosing clinical research as a profession. This new volume lays out the problem in detail, with specific recommendations to the federal government, the biotechnology and pharmaceutical industries, professional organizations, the health care industry, organized medicine, and the nation's universities and academic health centers. The volume explores how clinical research is conducted, what human resources are available, and what research opportunities lie ahead. Why health professionals become discouraged about clinical research. How the educational system has failed in this area and what programs stand out as models. How funding affects the supply of researchers. This practical book will be of immediate interest to public and private agencies funding research, research administrators, medical educators, health professionals, and those pursuing a career in clinical investigation.

Mid and Late Career Issues Mo Wang 2012-10-12 This new book looks at the unique career issues faced by those workers in their mid and late career stages, particularly with regard to the psychosocial dynamics of mid and late careers. With the growth in aging workers worldwide, we need a deeper understanding of the unique challenges and issues as well as the practical implications related to the shifting demographics to an older workforce, particularly the aging of the baby boom generation. This book reviews, summarizes and integrates the literature on a wide variety of issues and organizational realities related to these workers. Numerous case studies based on one-on-one interviews with older workers and recent retirees provides illustrative examples of the key concepts discussed in each chapter. Students, researchers, and professionals in industrial organizational psychology, human resource management, developmental psychology, vocational psychology and gerontology will find this authoritative book of interest.

The Boundaryless Career Michael B. Arthur 2001-07-26 Organizational restructuring and global, hypercompetition have revolutionized careers and destroyed the traditional blueprint for advancement and career success. This book details the new forms work takes in the new organizational era where worker mobility has become critical to the well-being and learning of both people

and firms. The Boundaryless Career approaches the new principle of the boundaryless career in five directions. The first section helps the reader explore the nature of boundaryless careers by highlighting some of their essential elements. The second section turns to competitive advantage and the role of workers' knowledge. The third section concentrates on the role of the social structure in the organizing of work. The fourth section turns to focus on how boundaryless careers affect personal development and growth. The fifth section addresses the demands boundaryless careers create for schools, communities, and other social institutions. Introductory and concluding chapters by the editors offer frameworks for conceptualizing careers now and in the future. The Boundaryless Career provides a conceptual map of new career and employment forms to the prospective benefit of people making career choices, companies re-crafting human resource practices, schools and universities re-considering their roles, and policy-makers concerned with regional or national competitiveness. It will be essential reading for scholars in a range of social science disciplines spanning themes of economics, management, education, organizational behavior, and the psychology and sociology of work. It will also appeal broadly to free thinkers interested in the changing nature of careers and employment as both people and firms tackle the realities of increasingly open markets and global competition.

Repatriation to France and Germany Matthias Walther 2014-05-19 A significant amount of German and French career agents are involved with international careers. Applying Bourdieu's Theory of Practice, Matthias Walther compares the repatriation of German and French career agents into the external labor markets of their parent country career fields. A qualitative content analysis of 40 semi-structured interviews shows that the German and French career agents' career capital and habitus develops during expatriation, which has an important impact on the re-integration into the parent country career field. The Author shows that in an international career mobility context, the rules of the game change compared to the rules in a pure national career context, which challenges the pertinence of national career models in understanding repatriation in a Franco-German context.

Vocational Psychological and Organisational Perspectives on Career 2009-01-01 Written by international experts, the book opens by identifying some of the "tributaries" that flow into the "great delta of careers scholarship", and noting the need to link what are at present separate "islands" of scholarship. It is structured to allow comparison between the ways in which the two perspectives address career development and career management theory, research and interventions.
