Chromecast Device User Guide Joseph Joyner 2015-06-01 Since the internet speeds went above the 500kbps mark, the number of things people can do with their interconnected devices skyrocketed.

Automated homes, connected cars, and internet enabled TVs. The latter is what threatens to revolutionize the entertainment world as we know it, do away with cable TV and abolish the need for expensive blue-ray players. Even though smart TVs are so lucrative, most people find them either too costly, or limiting. The alternative would be going for a TV with an HDMI port, a USB port and purchasing a dongle to bring in the power of internet TV. Chromecast is one of the best and cheapest such tools in the market.

Television and Political Advertising Frank Biocca 2013-12-16 This volume represents one of the first major scholarly effort to unravel the psychological and symbolic processing of political advertising.

Utilizing survey, experimental, qualitative, and semiotic methodologies to study this phenomenon, the contributors to Television and Political Advertising trace how political ads help to interpret the psychological reality of the presidential campaign in the minds of millions of voters. A product of the National Political Advertising Research Project, this interdisciplinary effort is valuable to

researchers in advertising, communication, and consumer psychology since it helps define future work on the relationship between television, politics, and the mind of the voter. This volume, *Television and Political Advertising: Psychological Processes*, is the first of two, and covers such topics as *Models and Theories for Viewing Political Television*; *Psychological Processing of Issues, Images, and Form*; *Differential Processing of Positive and Negative Advertising*; and *The Psychological Contexts of Processing*.
