Education and the Historic Environment Mike Corbishley 2004-07-31 Practical, inspiring and instructive, Education and the Historic Environment emphasizes the contribution to both education and heritage that results from a positive relationship between the two disciplines. Education and the Historic Environment examines evidence, case studies and chapters from a wide cross section of the heritage sector and: argues for the value of using the physical remains of the past shows how and where the historic environment can be used to fit into and enhance learning examines how guidelines are reinforced looks at how physical heritage can not only be used to teach obvious subjects such as history, but are also useful across the curriculum, from literacy and numeracy to citizenship. Teachers at all levels, and students, academics and professionals in archaeology and heritage management, will all be able to use the case studies to reform and enhance their work.

Becoming an Archaeologist Joe Flatman 2011-06-30 Becoming an Archaeologist: A Guide to Professional Pathways is an engaging handbook on career paths in the area of archaeology. It outlines in straightforward fashion the entire process of getting a job in archaeology, including the various options; the training that is required; and how to get positions in the academic, commercial and government worlds. It also includes discussion of careers in related heritage professions such as museums and conservation societies. The book includes a series of interviews with real archaeologists, all young professionals who began their careers within the last ten years. These insider guides offer essential tips on how they got their first job and progressed in their careers. Written in an accessible style, the book is essential reading for anyone interested in the realities of archaeology in the 21st century.

Remote Sensing in Archaeology Jay K. Johnson 2006-03-19 The coming of age of a technology first developed in the 1950s. All the money spent by the United States space program is not spent looking at the stars. NASA is composed of a vast and varied network of scientists across the academic spectrum involved in research and development programs that have wide application on planet Earth. Several of the leaders in the field of remote sensing and archaeology were recently brought together for a NASA-funded workshop in Biloxi, Mississippi. The workshop was organized specifically to show these archaeologists and cultural resource managers how close we are to being able to "see" under the dirt in order to know where to excavate before ever putting a shovel in the ground. As the book that resulted from this workshop demonstrates, this fantasy is quickly becoming a reality. In this volume, eleven archaeologists reveal how the broad application of remote sensing, and especially geophysical techniques, is altering the usual conduct of dirt archaeology. Using case studies that both succeeded and failed, they offer a comprehensive guide to remote sensing techniques on archaeological sites throughout North America. Because this new technology is advancing on a daily basis, the book is accompanied by a CD intended for periodic update that provides additional data and illustrations. with contributions by: R. Berle Clay, Lawrence B. Conyers, Rinita A. Dalan, Marco Giardino, Thomas J. Green, Michael L. Hargrave, Bryan S. Haley, Jay K. Johnson, Kenneth L. Kvamme, J. J. Lockhart, Lewis Somers

Archaeology and Urban Settlement in Late Roman and Byzantine Anatolia John Haldon 2018-10-31 The site of medieval Euchaita, on the northern edge of the central Anatolian plateau, was the centre of the cult of St Theodore Tiro ('the Recruit'). Unlike most excavated or surveyed urban centres of the Byzantine period, Euchaita was never a major metropolis, cultural centre or extensive urban site, although it had a military function from the seventh to ninth centuries. Its significance lies precisely in the fact that as a small provincial town, something of a backwater, it was probably more typical of the 'average' provincial Anatolian urban settlement, yet almost nothing is known about such sites. This volume represents the results of a collaborative project that integrates archaeological survey work with other disciplines in a unified approach to the region both to enhance understanding of the history of Byzantine provincial society and to illustrate the application of innovative approaches to field survey.

Archaeology Is a Brand! Cornelius Holtorf 2016-07-01 What impact is there on the field to recognize that archaeology is a regular feature in daily life and popular culture? Based upon the study of England, Germany, Sweden and the USA, Cornelius Holtorf examines the commonalities and peculiarities of media portrayal of archaeology in these countries, and the differences between media presentations and audience knowledge and attraction to the subject. In his normal engaging, populist style, Holtorf discusses the main strategies available to archaeologists in engaging with their popular representations. Possessors of a widely recognized, positively valued and well underpinned brand, archaeologists need to take more seriously the appeal of their work.

Mijn Europese familie Karin Bojs 2017-06-23 Stamboomonderzoekers slagen erin hun voorouders tot negen of tien generaties geleden in kaart te brengen. Nieuwe DNA-technologie biedt nog meer mogelijkheden. Karin Bojs besloot het genealogisch onderzoek in te duiken en door DNA-analyses meer te weten te komen over haar banden met haar familie uit de prehistorie. Ze las honderden wetenschappelijke studies, interviewde toonaangevende wetenschappers en reisde naar tientallen landen om de sporen naar haar verleden te volgen. Het resultaat is een boek over de geschiedenis van Europa vanaf de eerste prehistorische immigratiegolf tot aan vandaag – over Vikingen, vroege landbouwers in het Midden-Oosten en dwarsfluit spelende holbewoners in Duitsland en Frankrijk. Het verhaal dat ze ons voorlegt is ons eigen verhaal. Wij Europeanen zijn familie van elkaar. Ergens, ooit, leefden uw en haar gemeenschappelijke voorouder en voorvader. DNA verbindt ons allemaal.

The Birth of Modern Britain: A Journey into Britain's Archaeological Past: 1550 to the Present Francis Pryor 2011-02-17 From the author of 'Britain BC', 'Britain AD' and 'Britain in the Middle Ages' comes the fourth and final part in a critically acclaimed series on Britain's hidden past.

The Complete Guide to the Temple Mount Excavations Eilat Mazar 2002 Professor Mazar viewed the excavations at the Temple Mount as the apex of his

scientific contribution. Now his granddaughter, Dr. Eilat Mazar, continues his work and is heading the extensive project of publishing the findings from the sites. Dr. Eilat Mazar was part of the excavation team in the City of David from 1981-1985 that was headed by Professor Yigal Shiloh and from 1986-87 she led the excavations at the Ophel on behalf of the Institute of Archaeology at the Hebrew University. Dr. Mazar has been involved in archaeological research in Jerusalem for many years and has published numerous articles. She has written this guide in a language that everyone can understand without comprising scientific accuracy or the high level of research. This guide encompasses 3000 years of Jerusalem history and explores every period including descriptions of meaningful pieces from each era, accompanied by detailed explanations and attractive photographs and drawings. This guide is a masterful piece of work that allows the general audience a closer look at the past -- the Temple Mount in all of its original glory as it is now again revealed to our eyes. — Publisher description.

Zandstorm James Rollins 2010-10-04 In dit eerste deel van James Rollins' Sigma Force-reeks start de Sigma Force een onderzoek naar een mysterieus materiaal uit oude, Arabische legendes – zodat het niet in de handen van Het Gilde valt. In Zandstorm, het eerste deel van de Sigma Force-avonturenrillerreeks van bestsellerauteur James Rollins, start Sigma de zoektocht naar een legendarische, krachtige energievorm, voordat die in kwade handen terecht komt. Verborgen onder het zand van de woestijn ligt de legendarische stad Oebar, het immens rijke handelscentrum van het oude Arabië. Vermoedelijk is de locatie ook een geheimzinnige bron van antimaterie, die krachtig genoeg is om de hele aarde van energie te voorzien – of te vernietigen... Een expeditie van wetenschappers en Sigma-agenten Painter Crowe en Coral Novak trotseert zandstormen en een allesverzengende zon om de verdwenen stad Oebar te vinden en binnen te komen. Ze zijn op zoek naar de antimaterie en moeten die vinden voordat deze in handen valt van Het Gilde, dat er kwaadaardige bedoelingen mee heeft. James Rollins is een internationale bestsellerauteur. Zijn Sigma Force-thrillers worden in meer dan 40 landen uitgegeven. Rollins studeerde diergeneeskunde en woont in het Sierra Nevada-gebergte. Hij is fanatiek speleoloog en duiker. Van zijn boeken werden in Nederland en Vlaanderen ruim 120.000 exemplaren verkocht.

Archaeology Joe Flatman 2015-05-07 Whether it's Tomb Raider or Roman coins, the conventional view of archaeology as a discipline solely preoccupied with long dead cultures is misleading. In fact, archaeology is better described as a mode of thought – one by which we can better understand our past, present and future. Indeed, by studying artefacts of past human activity, we can even learn to better tackle great contemporary challenges like high population density and climate change. Spanning the globe and centuries – from Mesolithic burials in Sweden to modern landfill sites in Arizona – Joe Flatman shows how to view the world with an archaeologist's insight. What does a discarded food packet reveal about contemporary consumption patterns? How can infrared satellite imagery tell archaeologists where to undertake expensive excavation projects? What can archaeology reveal about the beginnings of the human race? Replete with textboxes highlighting key case studies from the history of the subject, and containing invaluable diagrams and photos illustrating the reality of being an archaeologist, this is the essential primer to reading landscapes, objects, and places.

Doing Archaeology Donald Henson 2012-08-21 Covering archaeology from a range of angles, incorporating history, major themes, theories and methods, Doing Archaeology provides a firm grounding for anyone interested in learning more about the discipline. Throughout the book, key information is accessibly presented and important questions are answered, including: What is archaeology? How did archaeology begin? How can archaeology tell us about the past? How can archaeology tell how people use space and the landscape? How can we use the past to understand people? How do archaeology and 'heritage' interact? What role does archaeology play in society today? How do we practice archaeology? Drawing on the experiences of practising archaeologists, with engaging examples and studies from sites around the world, this book gives the reader a sense of what it is to study archaeology and be an archaeologist. An essential text for students studying A-Level archaeology, those considering or beginning a degree/foundation degree in archaeology, and those of all ages interested in volunteering or becoming involved in archaeological projects.

The Soho Manufactory, Mint and Foundry, West Midlands George Demidowicz 2022-01-15 This volume provides a comprehensive analysis of the groundbreaking historic industrial complex created to the west of Birmingham in the eighteenth century and associated with Matthew Boulton, James Watt, and William Murdoch. The Soho Manufactory (1761-1863) and Soho Mint (1788-1850s) were both situated in the historic parish of Handsworth, now in the city of Birmingham, and the Soho Foundry (1795-1895) lay in the historic township of Smethwick, now within Sandwell Metropolitan Borough. Together they played a key role in the Industrial Revolution, achieving many world 'firsts': the first working Watt steam engine, the first steam-engine powered mint and the first purpose-built steam engine manufactory (the Soho Foundry), to name but a few. Existing literature focuses largely on the biography of the people, primarily Boulton and Watt, or the products they manufactured. The place - the Soho complex - has attracted very little attention. This volume is the first to concentrate on the buildings themselves analysing not only their physical origins, development and eventual decline but also the water and steam power systems adopted. An interdisciplinary approach has been employed combining archival research in the magnificent Soho collection at the Library of Birmingham with the results of archaeological excavations. The volume is profusely illustrated with archival material, most published for the first time, and contains a large number of reconstruction plans and drawings by the author.

Public History Faye Sayer 2015-02-26 Public History: A Practical Guide explores history in the public sphere and examines the variety of skills that historians require in the practice of public history. It discusses how through various mediums of interpretation and presentation a range of actors, which include museums, archives, government agencies, community history societies and the media and digital media, make history accessible to a wider audience. It provides the reader with an overview of the wider-world application and communication of history beyond the classroom through core case studies for each sector that include ideas for best practice 'in the field'. This book offers an accessible and engaging synopsis of a topic that has not previously been covered. By focusing on an area of study that has changed substantially in the last decade, Public History: A Practical Guide presents a comprehensive outline of the practice of 'public history', and provides ideas for future methodological approaches as well as a reference point for planning professional development in order to gain future employment in these sectors. In the current economic climate, students need to understand the potential use of history beyond university; this book contains the tools and advice needed for them to get one step ahead in terms of knowledge, skills and experience.

Histories on Screen Sam Edwards 2018-02-08 How, as historians, should we 'read' a film? Histories on Screen answers this and other questions in a crucial volume for any history student keen to master source use. The book begins with a theoretical 'Thinking about Film' section that explores the ways in which films can be analyzed and interrogated as either primary sources, secondary sources or indeed as both. The much larger 'Using Film' segment of the book then offers engaging case studies which put this theory into practice. Topics including gender, class, race, war, propaganda, national identity and memory all receive good coverage in what is an eclectic multi-contributor volume. Documentaries, films and television from Britain and the United States are examined and there is a jargon-free emphasis on the skills and methods needed to analyze films in historical study featuring prominently throughout the text. Histories on Screen is a vital resource for all history students as it enables them to understand film as a source and empowers them with the analytical tools needed to use that knowledge in their own work.

De zijderoutes Peter Frankopan 2016-03-08 'Door terug te kijken, ver terug te kijken, houdt Frankopan ons een spiegel voor, die uiteindelijk haarscherp laat zien dat we ons zullen moeten aanpassen – of we nou willen of niet.' – VPRO Tegenlicht DWDD-boekentip maart 2016 De zijderoutes is een schitterende verkenning van de elementen die de stuwende kracht waren achter de opkomst en de ondergang van wereldrijken, die de stroom van ideeën en goederen bepaalden en nu een nieuw tijdperk inluiden in de internationale politiek. Het gebied ten oosten van de Middellandse en de Zwarte Zee tot aan de Himalaya, dwars door Centraal-Azië tot diep in China en India, was duizenden jaren het middelpunt van de aarde. Het is de bakermat van onze beschaving, waar meer dan 2500 jaar v.Chr. metropolen ontstonden als Harappa en Mohenjodaro met een bevolking die in de tienduizenden liep en met straten die waren aangesloten op een geavanceerd rioleringsstelsel. Het is ook het gebied van de zijderoutes – handelsroutes maar ook verbindingswegen waarlangs opvattingen, religies, ideeën, cultuur én ziektes zich konden verspreiden. Hier begint Peter Frankopan zijn nieuwe wereldgeschiedenis. Na de eerste zijderoutes ontstonden er andere: de slavenroute, de goudroute, de route naar het zwarte goud. Maar in onze eenentwintigste eeuw zijn nieuwe routes aan het ontstaan die een grote gelijkenis vertonen met die allereerste, die Centraal-Azië doorkruisten. De zijderoutes komen terug! 'Briljante verhaallijnen (...) Een wereldgeschiedenis die het middelpunt van die wereld naar het oosten verplaatst.' – The Economist 'Veel boeken beweren "een nieuwe geschiedenis van de wereld" te zijn; dit boek heeft die benaming met recht.' – The Times

Spectacle and Display: A Modern History of Britain's Roman Mosaic Pavements Michael Dawson 2021-05-20 Antiquarian interest in the Roman period mosaics of Britain began in the 16th century. This book is the first to explore responses and attitudes to mosaics, not just at the point of discovery but during their subsequent history. It is a field which has received scant attention and provides a compelling insight into the agency of these remains.

Archaeology: An Introduction Kevin Greene 2002-11-01 This fourth edition constitutes the most extensive reshaping of the text to date. In a lucid and accessible style Kevin Greene explains the discovery and excavation of sites, outlines major dating methods, gives clear explanations of scientific techniques, and examines current theories and controversies. New features include: a completely new user-friendly text design with initial chapter overviews and final conclusions, key references for each chapter section, an annotated guide to further reading, a glossary, refreshed illustrations, case studies and examples, bibliography and full index a new companion website built for this edition providing hyperlinks from contents list to individual chapter summaries which in turn link to key websites and other material an important new chapter on current theory emphasizing the richness of sources of analogy or interpretation available today. This new edition provides students with a sound introduction to the field of archaeology and guides them towards further study.

The Archaeology of Mesopotamia Dr. Roger Matthews 2003 This volume evaluates the theories, methods, approaches and history of Mesopotamian archaeology from its origins in the 19th century up to the end of the 20th century.

Ravenzwart Ann Cleeves 2011-08-19 Op een koude januariochtend wordt in de sneeuw die Shetland bedekt het lichaam gevonden van Catherine Ross. Het zeventienjarige meisje is gewurgd met een sjaal. Boven het lichaam cirkelt een grote groep raven. Inspecteur Jimmy Perez ondervraagt als eerste Magnus Tait, de laatste die Catherine in leven heeft gezien. De plaatselijke bevolking brengt de verdachte ook in verband met de verdwijning van de elfjarige Catriona Bruce, een aantal jaren geleden. Voor de bewoners van Shetland is Magnus de gedoodverfde moordenaar. Maar Perez twijfelt. Is deze eenzame, tragische figuur wel tot moord in staat?

Archaeology: What It Is, Where It Is, and How to Do It Paul Wilkinson 2020-02-27 A practical introduction covering all core aspects of archaeology, this book is perfect for anyone looking to get involved in archaeology on a professional level or as a volunteer, or simply wanting an overview of the discipline. Aerial and ground survey, excavation and fieldwork, recording methods, soil sampling and small finds are all discussed.

What Happened When Tim Taylor 2005-11-15 Recent surveys have shown that, as a nation, our knowledge of British history is sketchy at best. In this book, Tim Taylor and the expert archaeologists and historians behind the hit Channel 4 series *Time Team* will set us straight. Each member of the team will select the events they believe had a major impact on our society.

Thinking of Questions Peter Limm 2015-09-23 This is not a conventional book. It is designed to stimulate and challenge all people who are curious to find out about the world they inhabit and their place within it. It does this by suggesting questions and lines of questioning on a wide range of topics. The book does not provide answers or model arguments but prompts people to create their own questions and a reading log or journal. To this end, almost all questions have a list of books or articles to provide a starter for stimulating further reading. Once you start, you will be hooked! Never stop questioning.

History on Television Ann Gray 2013 In recent years non-fiction history programmes have flourished on television. This interdisciplinary study of history programming identifies and examines different genres employed by producers and tracks their commissioning, production, marketing and distribution histories. With comparative references to other European nations and North America, the authors focus on British history programming over the last two decades and analyse the relationship between the academy and media professionals. They outline and discuss often-competing discourses about how to 'do' history and the underlying assumptions about who watches history programmes. *History on Television* considers recent changes in the media landscape, which have affected to a great degree how history in general, and whose history in particular, appears onscreen. Through a number of case studies, using material from interviews by the authors with academic and media professionals, the role of the 'professional' historian and that of media professionals – commissioning editors and producer/directors - as mediators of historical material and interpretations is analysed, and the ways in which the 'logics of television' shape historical output are outlined and discussed. Building on their analysis, Ann Gray and Erin Bell ask if history on television fulfils its potential to be a form of public history through offering, as it does, a range of interpretations of the past to and originating from or including those not based in the academy. Through consideration of the representation, or absence, of the diversity of British identity – gender, ethnicity and race, social status and regional identities – the authors substantially extend the scope of existing scholarship into history on television. *History on Television* will be essential reading for all those interested in the complex processes involved in the representation of history on television.

Know it All, Find it Fast Robert John Duckett 2008 There is a queue, the phone is ringing, the photocopier has jammed and your enquirer is waiting for a response. You are stressed and you can feel the panic rising. Where do you go to find the information you need to answer the question promptly and accurately? Answering queries from users is one of the most important services undertaken by library and information staff. Yet it is also one of the most difficult, least understood subjects. There are still very few materials available to help frontline staff - often paraprofessional - develop their reader enquiry skills. This award-winning sourcebook is an essential guide to where to look to find the answers quickly. It is designed as a first point of reference for library and information practitioners, to be depended upon if they are unfamiliar with the subject of an enquiry - or wish to find out more. It is arranged in an easily searchable, fully cross-referenced A-Z list of around 150 of the subject areas most frequently handled at enquiry desks. Each subject entry lists the most important information sources and where to locate them, including printed and electronic sources, relevant websites and useful contacts for referral purposes. The authors use their extensive experience in reference work to offer useful tips, warn of potential pitfalls, and spotlight typical queries and how to tackle them. This new edition has been brought right up-to-date with all sources checked for currency and many new ones added. The searchability is enhanced by a comprehensive index to make those essential sources even easier to find - saving you valuable minutes! Readership: Offering quick and easy pointers to a multitude of information sources, this is an invaluable reference deskbook for all library and information staff in need of a speedy answer, in reference libraries, subject departments and other information units.

The Archaeology Coursebook Jim Grant 2001-09-20 This fully updated and revised edition of the best-selling title *The Archaeology Coursebook* is a guide for students studying archaeology for the first time. Including new methods and key studies in this fourth edition, it provides pre-university students and teachers, as well as undergraduates and enthusiasts, with the skills and technical concepts necessary to grasp the subject. *The Archaeology Coursebook*: introduces the most commonly examined archaeological methods, concepts and themes, and provides the necessary skills to understand them explains how to interpret the material students may meet in examinations supports study with key studies, key sites, key terms, tasks and skills development illustrates concepts and commentary with over 400 photos and drawings of excavation sites, methodology and processes, tools and equipment provides an overview of human evolution and social development with a particular focus upon European prehistory. Reflecting changes in archaeological practice and with new key studies, methods, examples, boxes, photographs and diagrams, this is definitely a book no archaeology student should be without.

Handbook of Archaeological Theories R. Alexander Bentley 2008 This handbook, a companion to the authoritative *Handbook of Archaeological Methods*, gathers original, authoritative articles from leading archaeologists on all aspects of the latest thinking about archaeological theory. It is the definitive resource for understanding how to think about archaeology.

Archaeological Fantasies Garrett G. Fagan 2006 Including case studies, this collection of engaging and stimulating essays written by a diverse group of scholars, scientists and writers examines the phenomenon of pseudoarchaeology from a variety of perspectives.

Archaeology Kevin Greene 2010-06-17 *Archaeology: An Introduction* looks behind the popular aspects of archaeology such as the discovery and excavation of sites, the study of human remains and animal bones, radiocarbon dating, museums and 'heritage' displays, and reveals the methods used by archaeologists. It also explains how the subject emerged from an amateur pursuit in the eighteenth century into a serious discipline, and explores changing fashions in interpretation in recent decades. This fifth edition has been updated by a new co-author, Tom Moore, and continues to include key references and guidance to help new readers find their way through the ever expanding range of archaeological publications. It conveys the excitement of new archaeological discoveries that appear on television or in newspapers while helping readers to evaluate them by explaining the methods and theories that lie behind them. Above all, while serving as a lucid textbook, it remains a very accessible account that will interest a wide readership. In addition to drawing upon examples and case studies from many regions of the world and periods of the past, it incorporates the authors' own fieldwork, research and teaching and features a new four-colour text design and colour illustrations plus an additional 50 topic boxes. The comprehensive glossary and bibliography are

complemented by a support website hosted by Routledge to assist further study and wider learning. It includes chapter overviews, a testbank of questions, powerpoint discussion questions, web-links to support material for every chapter plus an online glossary and image bank. New to the fifth edition: inclusion of the latest survey techniques updated material on the development in dating, DNA analysis, isotopes and population movement coverage of new themes such as identity and personhood how different societies are defined from an anthropological point of view and the implications of this for archaeological interpretation the impact of climate change and sustainability on heritage management more on the history of archaeology Visit the companion website at www.routledge.com/textbooks/greene for additional resources, including: chapter overviews a testbank of questions PowerPoint discussion questions links to support material for every chapter an online glossary and image bank
