Bijna zes jaar na het overweldigende succes van 'Een weefsel in onze sterren' schrijft John Green met 'Schildpadden tot in het oneindige' opnieuw een briljante en onvergetelijke roman. Het begint allemaal met een nieuwsbericht over een voortvluchtige miljardair en het vooruitzicht van een grote beloning voor de gouden tip over zijn verblijfplaats. 'Schildpadden tot in het oneindige' gaat over vriendschap voor het leven, overwachte ontsnappingen, Star Wars-fanfictie en een tussentijd die 'het punt staat aan fortuin te zetten'. Maar bovenal gaat het over Aza Holmes, een meisje dat werkt als een dwanghoorn en kien komt te zitten in de verstikkende spiraal van haar gedachten. In dit langverwachte nieuwe boek deelt John Green het verhaal van Aza met verpletterende directheid: 'Dit is mijn eerste poging om openlijk te zeggen over de stoornis waar ikzelf sinds mijn vroegste jeugd mee worstel. Het verhaal is verzonnen, maar gaat wel degelijk ook over mij persoonlijk.'

A common idea within modern education is that digital technologies and traditional learning cannot exist successfully, that essentially technologies can be distracting and disrupting for students. It is believed that current implementations of technology in educational settings create an environment that is at odds with itself. However, this dichotomy between traditional learning and educational technologies does not need to be the default. Digital technology can be used in positive ways to enhance learning, whether it is providing easier access to information or in a creative light such as the implementation of video games as learning tools. Ultimately, it is possible to incorporate technologies into classical education strategies so that they complement each other. Acquiring Learning Skills With Digital Technology is a critical scholarly publication that examines cutting-edge research on how digital technologies disrupt the traditional learning structure, and proposes ways in which traditional learning and digital technology can complement each other. This will improve learning while communicating a program of skill-acquisitions that can become the basis for stand-alone general education courses and as teaching techniques. It examines three skills that the authors define as trim (abilities in the economy and concentration of language), track (progressive comprehension of documents), and test (pragmatic testing of data and precepts located on search engines). The authors demonstrate these skills' links to already-established digital skills, platforms, and protocols while also giving examples of each in both practice and format. The book examines a variety of technologies including video games, the internet, and social media, in particular Skype, Google, and Twitter. Featuring a wide range of topics such as social media, pedagogy, and psychology, this book is ideal for education professionals, academicians, IT professionals, researchers, computer scientists, psychologists, and students.

American Studies

This engaging study returns to a truly remarkable year, the year in which both Ulysses and The Waste Land were published, in which The Great Gatsby was set, and during which the Fascisti took over in Italy, the Irish Free State was born, the Harlem Renaissance reached its peak, Charlie Chaplin's popularity created, and King Tutankhamen's tomb was discovered. In short, the year which not only in hindsight became the primal scene of literary modernism but which served as the crucible for a host of major political and aesthetic transformations resonating around the globe. In his previous study, the acclaimed Dialect of Modernism (OUP, 1994), Michael North looked at the racial and linguistic struggles over the English language which gave birth to the many strains of modernism. Here, he expands his vision to encompass the global stage, and tells the story of how books changed the future of the world as we know it in one unforgettable year.

Cities have always been defined by their centrality. But literature demonstrates that their diverse peripheries define them, too: from suburbs to slums, rubbish dumps to nightclubs and entire failed cities.

In a diverse society, the ability to cross communication barriers is critical to the success of any individual personally, professionally, and academically. With the constant acceleration of course programs and the emergence of economics as the dominant discipline in the field—and lays out a new agenda for policymakers, researchers, and practitioners, from early education through adulthood. Learning is the foundation of the human experience. It begins at birth and never stops, a continuous and malleable link across life stages of human development. Disparities in learning access and outcomes around the world have deep consequences for income, social mobility, health, and well-being. For international development practitioners faced with today's unprecedented environmental and geopolitical pressures, learning should be viewed as a touchstone and target for those seeking to truly effect global change. This book traces the path of international development work—from its pre-colonial origins to the emergence of economics as the dominant discipline in the field—and lays out a new agenda for policymakers, researchers, and practitioners, from early education through adulthood. Learning as Development is an attempt to rethink international education in a changing world.

Beginning film studies offers the ideal introduction to this vibrant subject. Written accessibly and with verve, it ranges across the key topics and manifold approaches to film studies. Andrew Dism has thoroughly updated the first edition, and this new volume includes new case studies, overviews of recent developments in the discipline, and up-to-the-minute suggestions for further reading. The book begins by considering some of film's formal features—mise-en-scene, editing and sound—before moving outwards to narrative, genre, authorship, stardom and ideology. Later chapters on film industries and on film consumption—where and how we watch movies—assess the discipline's recent geographical 'turn'. The book references many film cultures, including Hollywood, Bollywood and contemporary Hong Kong. Case studies cover such topics as sound in The Great Gatsby and narrative in Inception. The superhero movie is studied; so too is Jennifer Lawrence. Beginning film studies is also interactive, with readers enabled throughout to reflect critically upon the field.

High School English Teacher's Guide to Active Learning

Business is woven into the very fabric of American life, yet rarely surfaces in the nation's literary history. Even in novels about business, it proves an elusive motif that fails to mirror actual business organisations. This book argues that literary representations of business remain ineffable because business serves potential aesthetic functions, subtly yet meaningfully impacting readers. Exploring the complex representation of business in realist, naturalist and modernist works, Erhan Zimek reveals these functions by analyzing how the motif intertwines with social developments, literary movements and author biographies. He thus illuminates the motif itself while highlighting the utility of a focus on the changing functions of literature.
